PVC WALL PROTECTION - HANDRAIL

AHR - 6289 Hand Rail

USAGE

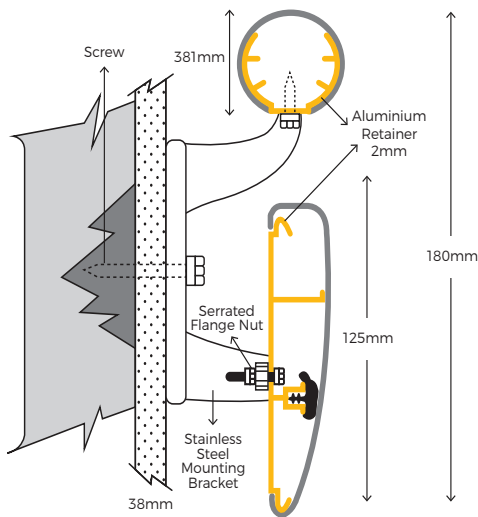

Warrior ProGuard Handrail (HR series) combines a stylish visual with fire retardant, anti-bacterial, anti-collision, and colorful features. Available in various color combinations to suit personal preferences, it is structurally designed to blend seamlessly into the environment. The handrail offers a comfortable grip and sturdy design for lasting protection.

FEATURES

- A. Fire retardant, anti-bacteria, anti-collision, and colorful features
- B. Designed with an anti-collision shock absorber inside
- C. Widely accepted in hospitals, nursing homes, restaurants, hotels, and other public places
- D. Provides facade protection for disabled and elderly individuals against falling
- E. Warrior ProGuard surface protection system prevents facade damage from wheelchairs, luggage barrows, cleaning trolleys, dining carts, etc.
- F. Minimizes building maintenance costs

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR - 6189 Hand Rail

USAGE

Warrior ProGuard Handrail (HR series) boasts fire retardancy, anti-bacterial properties, an anti-collision design, and vibrant colors with an integrated shock absorber. Commonly found in hospitals, nursing homes, hotels, and public spaces, it provides facade protection and reduces maintenance costs by preventing damage from wheelchairs and carts.

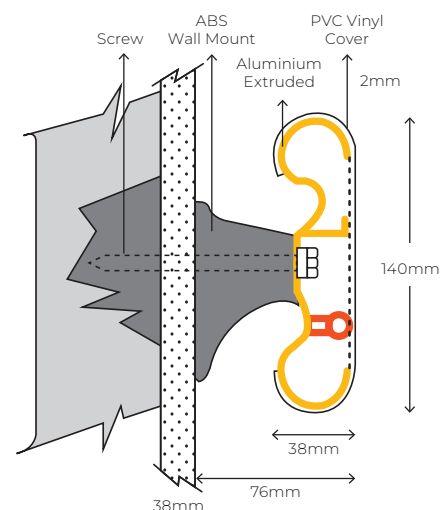

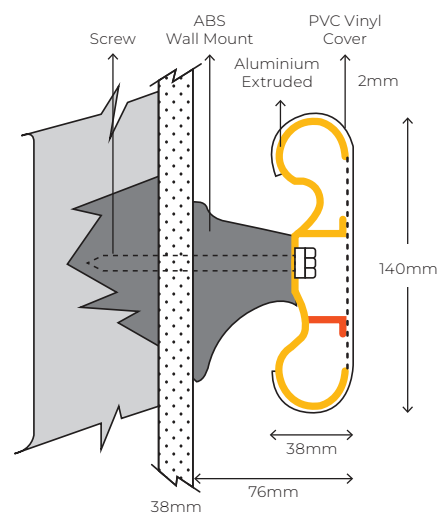

FEATURES

- A.Fire retardant, anti-bacteria, anti-collision, and colorful features
- B. Variety of color combinations that allowed more personal desire
- C. Structurally designed to blend into the environment
- D. Holding feel and sturdy design of the handrail to last and protect

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR - 6169F Hand Rail

USAGE

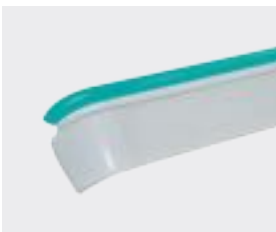

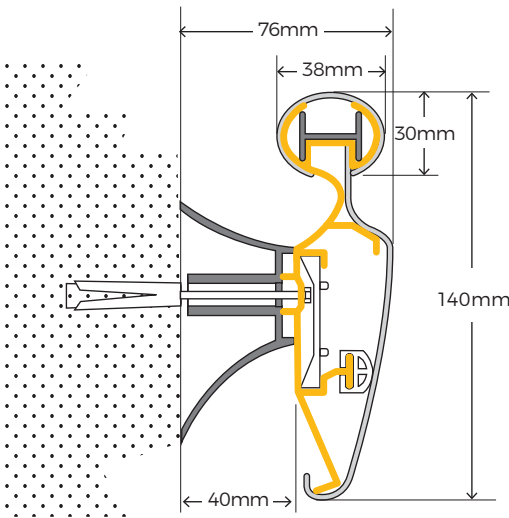

The Warrior handrail features a strong aluminum extruded retainer with a shock-absorbing design. Its cover is made from PVC resin extruded textured vinyl material with split-type, continuous elbow joints. The upper limb has a circular rail shape for easy gripping, while the broad, arc-shaped lower edge provides anti-impact protection to the wall facade.

FEATURES

- A. Fire retardant, anti-bacteria, anti-collision, and colorful features
- B. Body, strong Aluminium Extruded Retainer with Shock Absorber designed.
- C. Cover, PVC Resin Extruded Textured Vinyl material.
- D. the Cover is split type, with outer and inner continuous elbow joint.
- E. Upper limb of circular railed shape for easy for gripping and walking.
- F. Lower edge is in arc broad shape, for antiimpact, protection to wall facade.
- G. Warrior ProGuard surface protection system prevents facade damage from wheelchairs, luggage barrows, cleaning trolleys, dining carts, etc.
- H. Minimizes building maintenance costs

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR - 6169A Hand Rail

USAGE

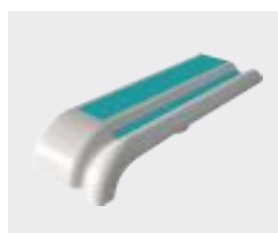

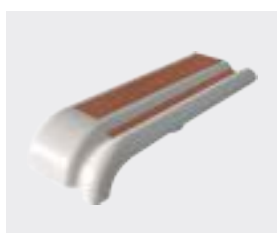

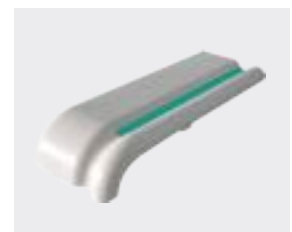

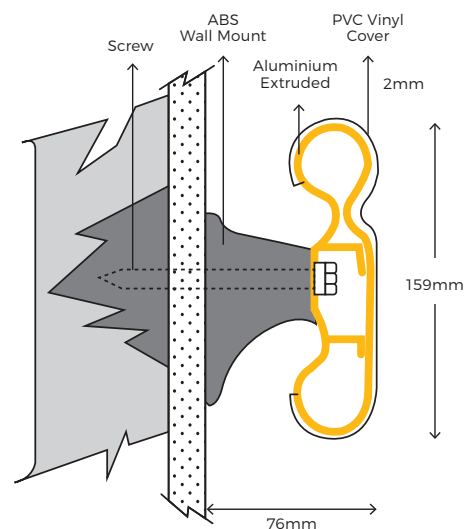

The Warrior ProGuard Handrail (HR series) is fire retardant, anti-bacterial, and features an anti-collision design with vibrant colors and an integrated shock absorber. Ideal for hospitals, nursing homes, hotels, and public spaces, it protects facades and reduces maintenance costs by preventing damage from wheelchairs and carts.

FEATURES

- A. Body, strong Aluminium Extrude Retainer designed.
- B. Fire retardant, anti-bacteria, anti-collision, and colorful features
- C. Cover, PVC Resin Extruded Textured Vinyl material.
- D. The cover is split type, with outer and inner continuous elbow joint.
- E. Upper limb of circular railed shape for easy for gripping and walking.
- F. Lower edge is in arc broad shape, for anti-impact, protection to wall.

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR - 6099F Hand Rail

USAGE

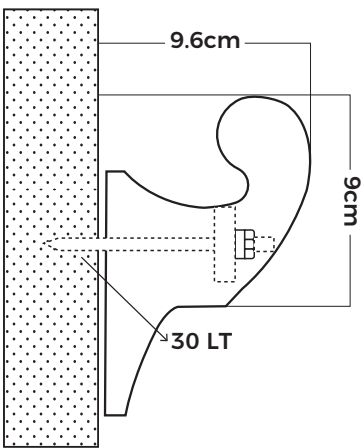

Warrior ProGuard Handrail boasts fire retardancy, anti-bacterial properties, an anti-collision design, and vibrant colors with an integrated shock absorber. Commonly found in hospitals, nursing homes, hotels, and public spaces, it provides facade protection and reduces maintenance costs by preventing damage from wheelchairs and carts.

FEATURES

- A. Inspired by the concept of water droplets, these handrails seamlessly blend functionality and fashion. Designed not only for their integrative role, they also serve as decorative elements, creating a cohesive and stylish unit.
- B. Widely accepted in commercial settings, they add a touch of warmth and comfort to any space, enhancing both the aesthetic appeal and the user experience.

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR - 6389 Hand Rail

USAGE

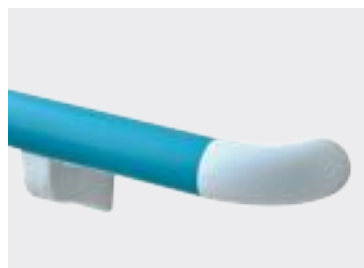

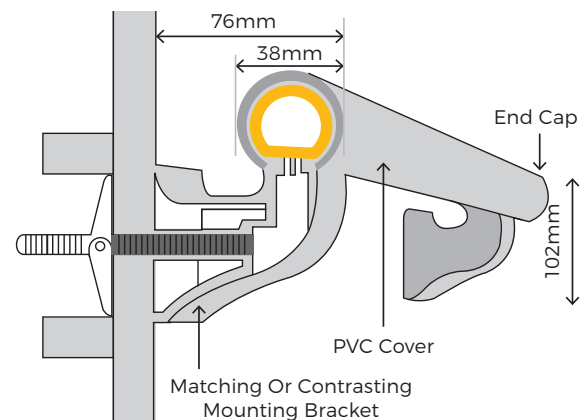

The Warrior handrail features a strong aluminum retainer with a shock-absorbing design. Its PVC resin cover has a textured vinyl finish with continuous elbow joints. The circular upper limb is easy to grip, while the broad, arc-shaped lower edge protects the wall facade from impacts.

FEATURES

- A. The inner Aluminium Extruded Retainer structure with the best intensity.
- B. Vinyl Textured resin cover material is colorful, warm and beautiful shaped.
- C. The tubular shape is according with the human engineering, it is easy to hold.
- D. Recommended use at common corridors, stairs area as the safety railings etc."

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR - KP 509 Hand Rail

USAGE

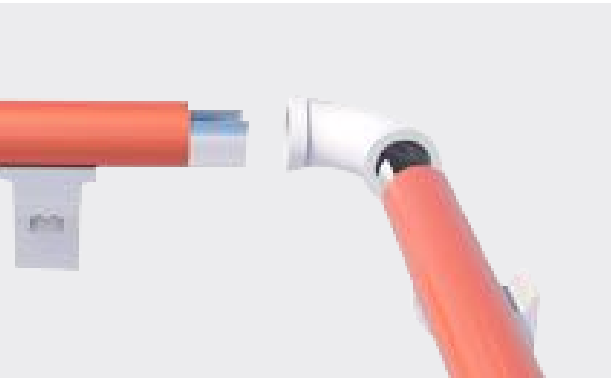

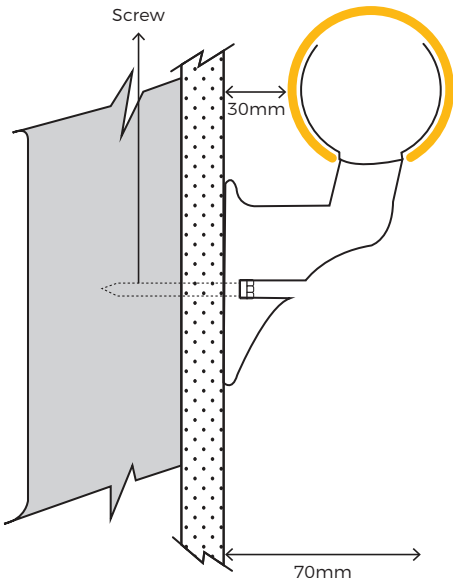

Warrior handrail has a 50mm diameter pipe and extends 85mm from the wall. Its lower construction features a continuous 2mm aluminum profile, while the top cover is made of vinyl acrylic material that is scratch-proof, antibacterial, and fireproof. It is recommended for use in common corridors and stair areas as a safety railing.

FEATURES

- A. The pipe has a diameter of 50mm.
- B. It extends 85mm from the wall.
- C. The lower construction is a continuous aluminum profile with a thickness of 2mm.
- D. The top cover is made of vinyl acrylic material, offering (scratch-proof, antibacterial, and fireproof features.)
- E. It is recommended for use in common corridors, stair areas, and other safety railing applications. This makes it ideal for hospitals, nursing homes, hotels, office buildings, and public spaces.

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR - 6399C Hand Rail

USAGE

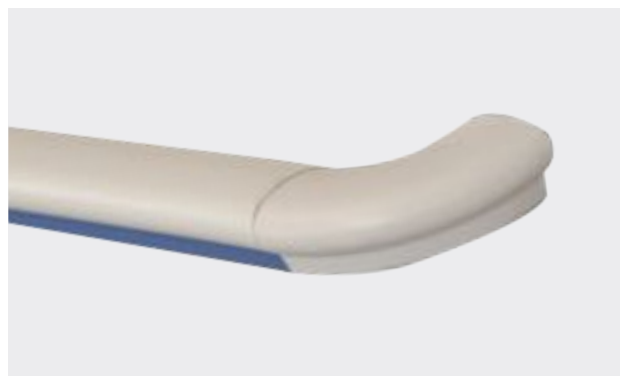

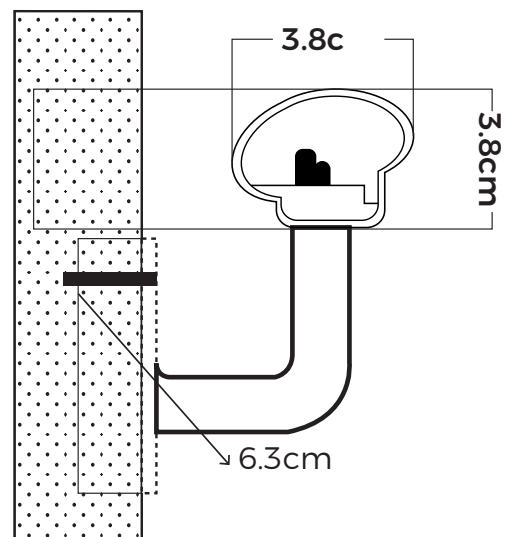

Warrior 6399C ergonomic handrail features an aesthetic design and a strong inner aluminum extruded retainer structure. Its top cover is made of vinyl acrylic material, which is scratch-proof, antibacterial, and fireproof. It is recommended for use in common corridors and stair areas as a safety railing.

FEATURES

- A. The pipe has a 50mm diameter and extends 85mm from the wall, providing a substantial and secure grip.
- B. Features a continuous aluminum profile with a thickness of 2mm for enhanced strength and durability.
- C. Made from vinyl acrylic, the handrail top cover is scratch-proof, antibacterial, and fireproof. It resists damage, reduces microbial growth, and enhances safety by preventing ignition and flame spread.
- D. Ideal for common corridors, stair areas, and safety railing applications in environments like hospitals, nursing homes, hotels, and office buildings.
- E. Designed to meet the demands of high-traffic public spaces, ensuring both safety and cleanliness.

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR - 6179A Hand Rail

USAGE

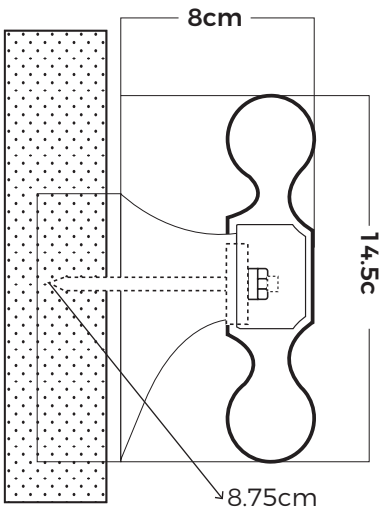

The Warrior handrail is constructed with a strong aluminum extruded retainer featuring a shock absorber design for enhanced durability and impact resistance. Its upper limb has a circular rail shape, providing a comfortable and secure grip while walking. Ideal for common corridors, stairways, and safety railings in various settings, it improves safety and comfort in high-traffic areas, ensuring long-lasting performance and reliability.

FEATURES

- A. The body of the design is crafted from high-strength aluminum extrusion, ensuring exceptional durability and resilience.
- B. It incorporates fire retardant properties, anti-bacterial treatment, and anti-collision features, while also offering a range of vibrant colors to match various aesthetic needs.
- C. The cover is made from PVC resin extruded textured vinyl, chosen for its durability and flexibility.
- D. The cover features a split-type design with continuous elbow joints, both outer and inner, for a seamless installation.
- E. The upper limb is designed with a circular rail shape to facilitate comfortable gripping and easy walking.
- F. Additionally, the lower edge is crafted in an arc broad shape to provide anti-impact protection and safeguard the walls from potential damage.

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR - 6739 Hand Rail

USAGE

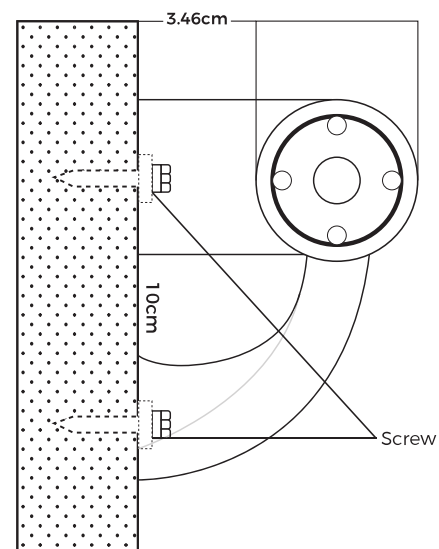

Warrior 6739 handrail features a robust inner aluminum extruded retainer structure for maximum strength. Its vinyl textured resin cover material is colorful, warm, and aesthetically pleasing, designed in a tubular shape that conforms to ergonomic principles for easy gripping. Recommended for installation in common corridors, stair areas, and other locations requiring safety railings.

FEATURES

- A. Ergonomic Handrail Design
Combines exceptional functionality with a sleek, modern aesthetic appearance, seamlessly integrating into various interior styles while providing essential support.
- B. Inner Structure Features a high-strength aluminum extruded retainer, ensuring superior intensity and durability.
- C. Top Cover: Made from vinyl acrylic material, known for its:
Scratch-proof properties
Antibacterial treatment
Fireproof capabilities
- D. The handrail is highly recommended for use in diverse settings where both safety and aesthetic considerations are paramount. It is ideal for installation in common corridors of residential and commercial buildings, where it not only offers essential support but also significantly enhances the visual appeal and safety of the space.

TECHNICAL DRAWING

PVC WALL PROTECTION - HANDRAIL

AHR6749LED Hand Rail

USAGE

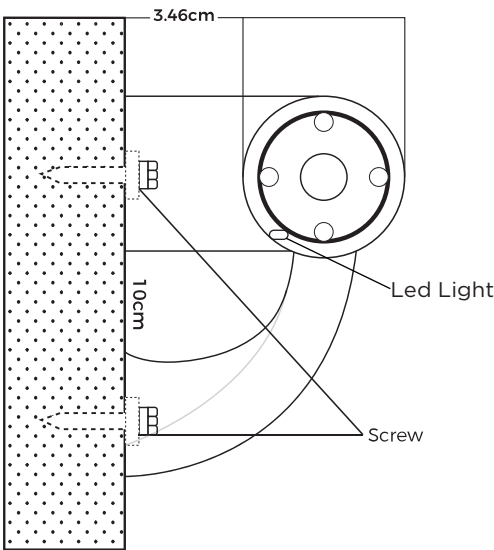

Warrior Innovative handrail featuring embedded LED cove lights, widely embraced in commercial settings for a warm and comforting ambiance. Made from PVC resin extruded textured vinyl material, ideal for use in common corridors and stair areas as safety railings.

FEATURES

- A. Unique Design Features embedded LED cove lights for enhanced visibility and a warm, inviting atmosphere.
- B. Commercial Appeal Widely accepted in commercial spaces, providing both functionality and aesthetic enhancement.
- C. Cover Material Made from durable PVC resin extruded textured vinyl for long-lasting performance and easy maintenance.
- D. Recommended Use Ideal for common corridors, staircases, and other areas requiring safety railings, combining practical support with modern elegance.

TECHNICAL DRAWING

PVC WALL PROTECTION - WALL GUARDS

AHR - Flat Wall Guards

USAGE

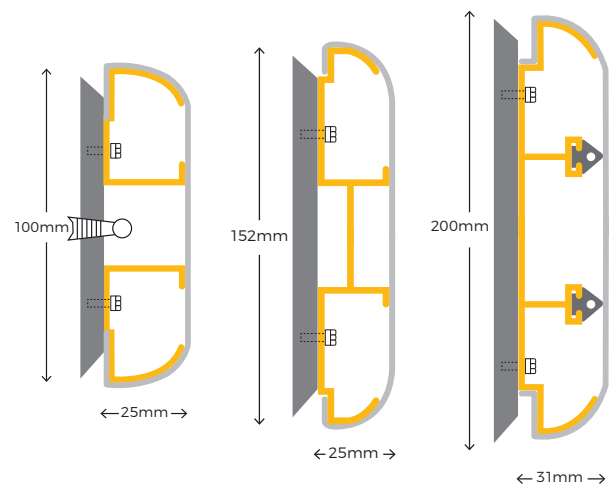

The Warrior flat wall guard features a durable, textured vinyl resin cover that is abrasion-resistant and antimicrobial. Its wide aluminum base offers exceptional anti-collision strength and fire resistance. Designed for extensive wall protection, it effectively shields against impacts from trolleys, shopping carts, and hospital beds.

FEATURES

- A. The Extruded Vinyl Textured resin cover is resistant to abrasion and antimicrobial.
- B. The broad Aluminium Extruded based is professionally designed with good anti-collision and excellent fire resistant performance.
- C. The surface with the textured grained is treated with ultraviolet light chemicals that prolong its performance from sun-ray exposures.
- D. Broad designed surface provides ultimate coverage to the wall in prevention of possible damage from external impact caused by trolleys, shopping carts, hospital beds etc..

TECHNICAL DRAWING

PVC WALL PROTECTION - WALL GUARDS

AWG - Curved Wall Guards

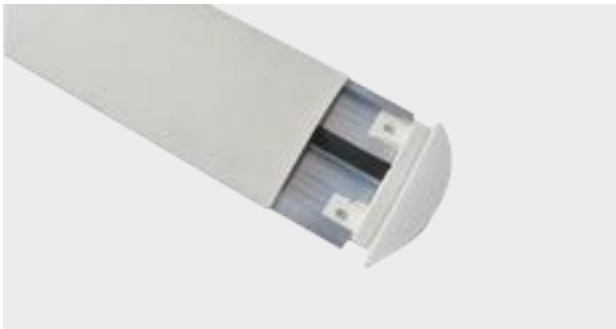

USAGE

Warrior curved wall guard features a resilient extruded vinyl textured resin cover that resists abrasion and is antimicrobial. Its curved and broad aluminum extruded base is skillfully engineered for superior anti-collision strength and outstanding fire resistance. Treated with UV chemicals, the textured surface enhances durability against sun exposure.

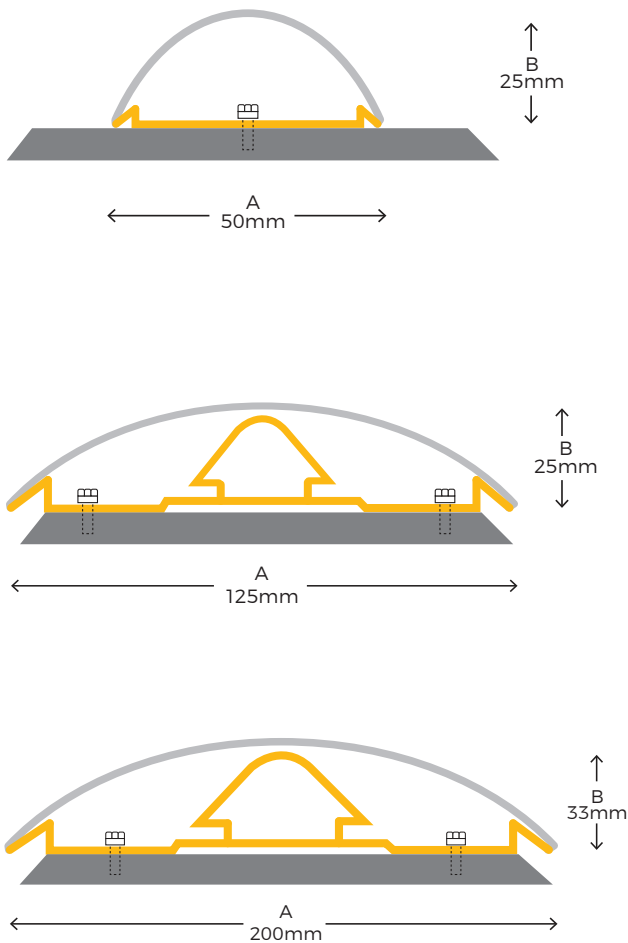

FEATURES

- A. The Extruded Vinyl Textured resin cover is resistant to abrasion and antimicrobial.
- B. The broad Aluminium Extruded based is professionally designed with good anti-collision and excellence fire resistant performance.
- C. The surface with the textured grained is treated with ultraviolet light chemicals that prolong its performance from sun-ray exposures.
- D. Broad designed surface provides ultimate coverage to the wall in prevention of possible damage from external impact caused by trolleys, shopping carts, hospital beds etc..

TECHNICAL DRAWING

PVC WALL PROTECTION - CORNER GUARDS

ACG Series Corner Guards

USAGE

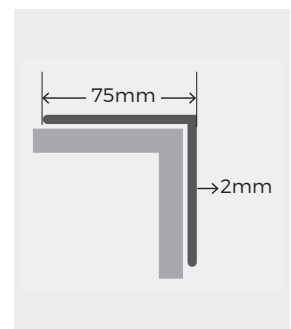

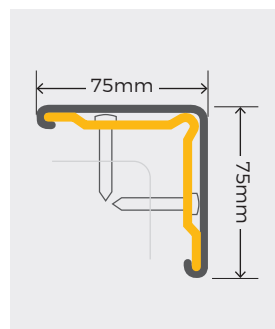

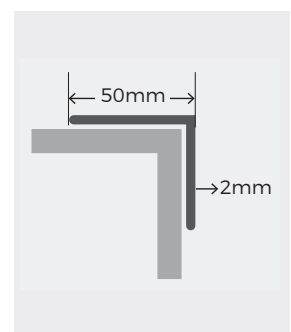

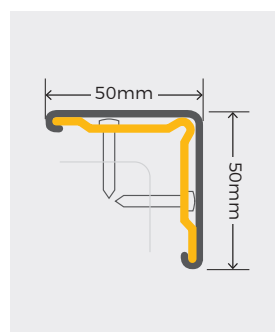

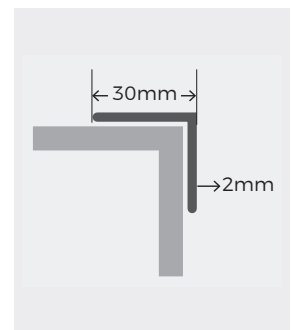

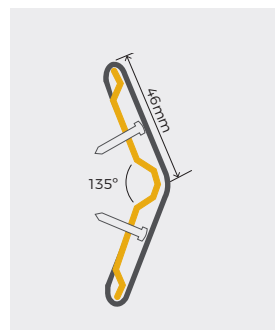

The Warrior PVC corner guard, made from robust PVC, is designed to protect corners from damage and wear. Its durable construction resists impact and abrasion, ensuring long-term protection in homes, offices, hospitals, and public areas. Available in various sizes and colors, it offers both functionality and aesthetic versatility.

FEATURES

- A. Durable PVC Material Ensures long-lasting protection against wear and tear.
- B. Corner Protection Shields corners from damage and abrasion.
- C. Variety of Colors and Sizes Matches any decor seamlessly.
- D. Easy Installation Secure with screws on the aluminum backing and PVC clip-on.
- E. Impact and Abrasion Resistant
Maintains integrity and appearance over time.
- F. Versatile Use Ideal for homes, offices, hospitals, and public spaces.
- G. Maintains Wall Appearance Keeps walls looking new and extends their lifespan.

TECHNICAL DRAWING

PVC WALL PROTECTION - PROTECTION SHEETS / STRIPS

PVC Wall Protection Sheets

USAGE

It is ideal for various applications. Its antibacterial, fire retardant, and impact-resistant properties make it perfect for high-traffic, hygienic environments.

FEATURES

- A. Size: 1000×3000 mm
- B. Thickness: 2 mm
- C. Material: ABS Plate
- D. Antibacterial, non-toxic, odorless
- E. Features: Fire retardant, impact resistant, abrasion and scratch resistant

PVC Wall Protection Strips

USAGE

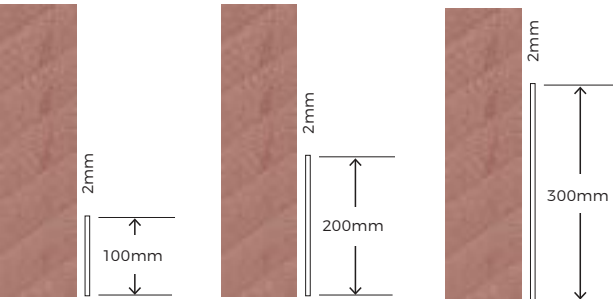

Manufactured from 2mm thick ABS plate, this material is ideal for high-traffic areas due to its impact resistance, abrasion and scratch resistance. Antibacterial and free of chemicals and odors, it is suitable for hygienic environments. Its fire retardant properties make it a safe choice for various applications.

FEATURES

- A. Material thickness is 2 mm.
- B. Manufactured from ABS Plate.
- C. It is antibacterial. It does not contain any chemical and toxic gas and does not smell.
- D. Fire retardant, Impact resistance, abrasion and scratch resistance.

TECHNICAL DRAWING

PVC WALL PROTECTION - PROTECTION PLATES

PVC Door Protection Plates

USAGE

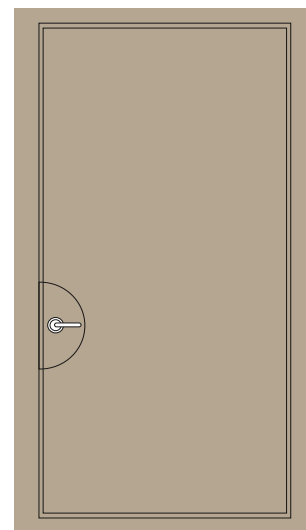

These ABS plates are ideal for door kicks and stretcher strikes, offering both style and functionality. With antibacterial properties, they're perfect for hygienic environments like hospitals and kitchens. The non-toxic, odorless, and fire retardant material enhances safety and cleanliness.

FEATURES

- A. Decorative Shapes and Sizes:
Available in an array of decorative shapes and sizes, it is particularly suited for door kicks and stretcher strikes, adding both functionality and aesthetic appeal to any setting.
- B. Antibacterial Properties: The material is inherently antibacterial, ensuring a hygienic environment by preventing the growth of harmful bacteria. This makes it suitable for use in settings where cleanliness is a priority, such as hospitals and kitchens.
- C. Non-Toxic and Odorless: It does not contain any chemicals or toxic gases, ensuring that it is safe for use in a variety of environments without emitting any unpleasant odors.
- D. Fire Retardant: The ABS plate is fire retardant, providing an added layer of safety by reducing the risk of fire-related incidents.

STAINLESS STEEL WALL PROTECTION - CORNER GUARD

Stainless Steel Corner Guard

USAGE

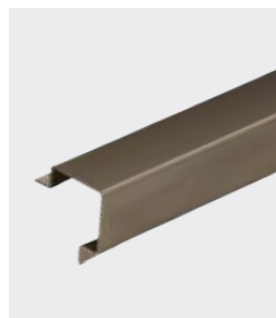

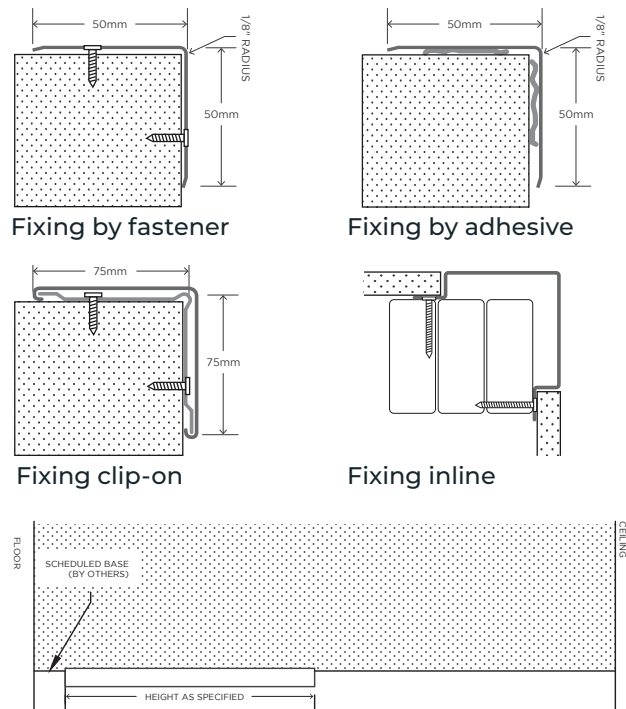

The Warrior stainless steel corner guard is offered in high-quality 304/316 grades, with standard stock lengths of 2.4 meters and 3 meters. It can be customized to fit specific requirements, including adjustable wing sizes, heights, and angles. Available in both mirror and matte finishes, it combines durability with aesthetic flexibility to suit various applications.

FEATURES

- A. High-Quality Material: Made from high-quality 304/316 stainless steel, this product ensures durability and longevity.
- B. Stock Lengths: Available in 2.4 meters and 3 meters to fit various installation needs.
- C. Customizable Options: Adjustable wing sizes, heights, and angles to meet specific requirements.
- D. Finish Choices: Offered in mirror and matte finishes to match different aesthetic preferences.
- E. Versatile Use: Suitable for residential, commercial, and industrial applications, providing both functionality and style.

TECHNICAL DRAWING

STAINLESS STEEL WALL PROTECTION - WALL GUARD

Stainless Steel Wall Guard

USAGE

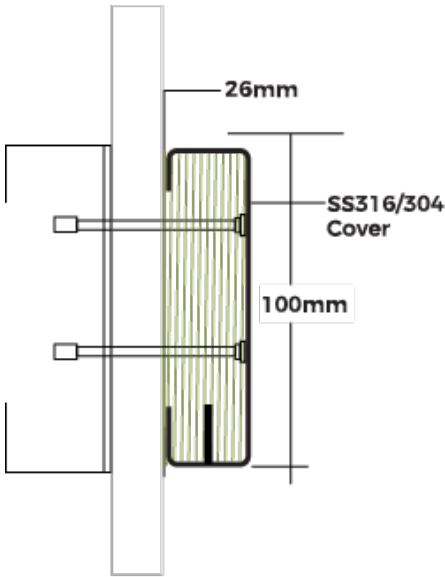

Warrior stainless steel wall guards, available in custom lengths and easily cut on-site, include all necessary mounting fasteners. Choose between 304 or 316 grade stainless steel, and select from brushed, hairline, mirror, or custom finishes to meet your specific needs.

FEATURES

- A. Our products are available in custom lengths and can be easily field-cut to the required sizes, providing maximum flexibility and convenience during installation in various settings. This adaptability ensures a perfect fit for every project, regardless of complexity or space constraints.
- B. Each order includes all the necessary mounting fasteners, ensuring a secure and stable setup that is both reliable and durable. This comprehensive package simplifies the installation process, giving installers confidence in the safety and longevity of the installation.
- C. Choose between 304 and 316 grade stainless steel for excellent durability and corrosion resistance, with 316 being ideal for harsher environments.
- D. We offer a range of finishes including brushed, hairline, mirror, and custom options to suit various aesthetic preferences. These features ensure our products meet diverse customer needs with quality and ease.

STAINLESS STEEL WALL PROTECTION - KICK PLATE

Stainless Steel Kick Plate

USAGE

The Alloy 5052-H32 .063" Thick Aluminum Kick Plate with Super Duty Polyurea coating protects walls from impact and wear in high-traffic areas. Ideal for commercial and industrial settings, it's customizable in size, height, and angle, with various finishes available for durability and aesthetic integration.

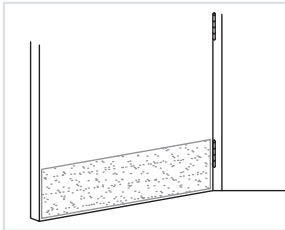

FEATURES

- A. This high-strength aluminum is coated with a Super Duty Polyurea layer, offering enhanced durability and resistance to wear, impact, and harsh environmental conditions, making it ideal for demanding applications.
- B. Custom sizes, heights, and angles available
- C. Offered in various finishes to match design preferences
- D. Mounting options include adhesive (ADH-50) or drilled with customizable drilling specifications

STAINLESS STEEL WALL PROTECTION - HAND RAIL

Stainless Steel Hand Rail

USAGE

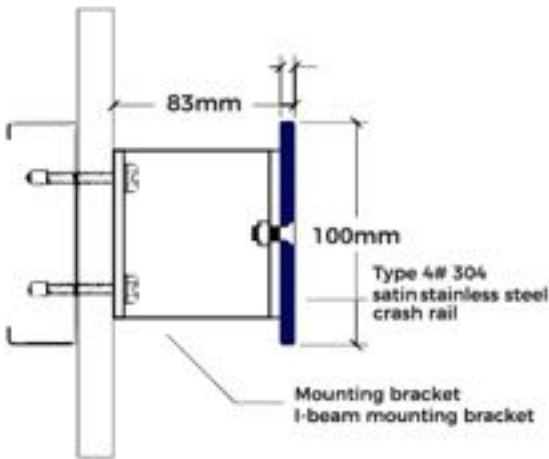

The 100mm Wall Protection is ideal for high-traffic areas like hospitals, schools, and industrial facilities. It shields walls from damage by trolleys and equipment, ensuring durability while blending seamlessly with your decor. Easy to maintain, it keeps spaces looking clean and professional.

FEATURES

- A. Custom Lengths: Each piece is manufactured to your specified dimensions, ensuring a precise and perfect fit for your unique installation needs. This customization allows for seamless integration into any space.
- B. On-Site Adjustments: The material can be easily field-cut to the exact required lengths during installation, offering flexibility and convenience for adapting to specific site conditions.
- C. Complete Installation Kit: Every order comes with a comprehensive set of mounting fasteners, making the setup process straightforward and hassle-free. This ensures that you have everything needed for a secure installation.
- D. Durable Protection: Engineered to provide robust protection for walls across a range of environments, this product is designed for long-lasting performance. Its durability guarantees effective safeguarding against damage, ensuring both reliability and extended service life.

STAINLESS STEEL WALL PROTECTION - HAND RAIL

Stainless Steel Round Hand Rail

USAGE

- A. 38mm O.D. Type SS304/316 Brushed Stainless Hand Railing Tubing
- B. 1.2 Wall thickness
- C. Stock lengths: 3M/6M
- D. Matching returns, corners, and splices available
- E. Other finishes available
- F. Custom lengths and angles available

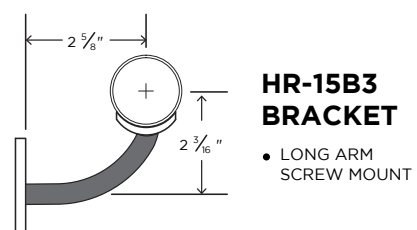

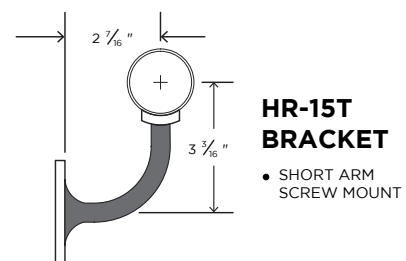

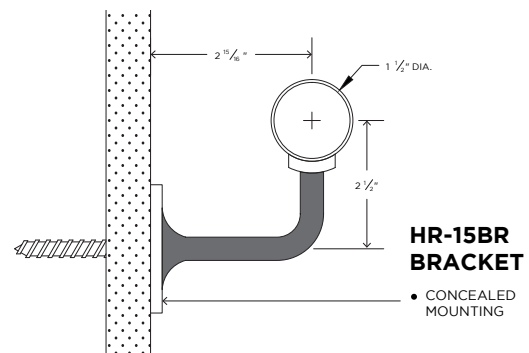

FEATURES

- A. Available in 25mm to 54mm diameter, in 304 and 316 grade.
- B. Comes with matching end caps, corners, brackets, splices, and mounting hardware for easy installation.
- C. Can be mounted on drywall, glass, or posts with various style options.
- D. Strong enough to resist heavy impact and withstand harsh cleaning agents.
- E. Protects walls while providing reliable support in various settings like hospitals, factories, and corridors.

TECHNICAL DRAWING

OPTIONAL BRACKET STYLES:

WOOD WALL PROTECTION - HAND RAIL

Wooden Hand Rail

USAGE

Warrior Wooded Handrail is a solid wood design. The wooden handrail options features stainless steel returns, corners, and mounting brackets for a stylish contrast.

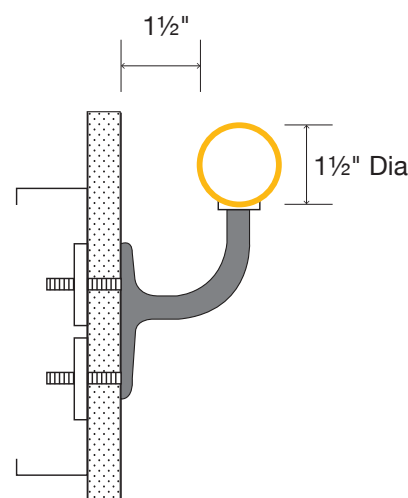

Hospitals, schools, universities, laboratories, hotels, function halls, auditoriums, lobbies, hallways, corridors, waiting rooms, nurse stations.

FEATURES

- A. Crafted for durability and elegance, these handrails combine solid wood with sleek stainless steel for a modern, strong design.
- B. Choose from premium hardwoods like beech, oak, maple, and ash, each with unique grain patterns and textures to match your design aesthetic.
- C. Tailor the handrails to your decor by selecting from six distinct wood stains, ensuring a perfect match for your interior design preferences.
- D. Ideal for hospitals, schools, hotels, and public spaces, these handrails offer both functional support and aesthetic appeal.
- E. Visit the Protek System Gallery for inspiration and to see the handrails in various settings.

RUBBER WALL PROTECTION - WALL GUARDS

Rubber Wall Guard

USAGE

Our solid rubber wall guards are easily fixed to walls and can wrap around steel or concrete bollards. They absorb impact, reducing property damage. Suitable for horizontal or vertical installation along walls, columns, and ramps, these guards are ideal for loading bays, service areas, and car parks. We supply ‘E’ guards cut to your site’s exact length.

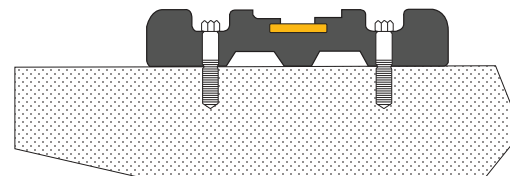

FEATURES

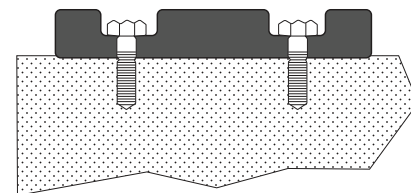

- A. Secure Fixing: Easily and securely attaches to walls.
- B. Versatile Coverage: Wraps around steel or concrete bollards.
- C. Impact Absorption: Reduces damage by absorbing impacts.
- D. Flexible Installation: Can be fixed horizontally or vertically along walls, columns, and ramps.
- E. Custom Lengths: ‘E’ guards cut to exact site requirements for a perfect fit.

RUBBER WALL PROTECTION - WHEEL STOPPER

Rubber Wheel Stopper

USAGE

Warrior Wheel Stoppers, made from solid rubber, help prevent vehicle damage by clearly indicating correct wheel positioning. With pre-drilled holes for easy installation on concrete or asphalt, they absorb impact and quickly return to shape. Ideal for protecting columns and lighting, they offer durability and effective impact resistance.

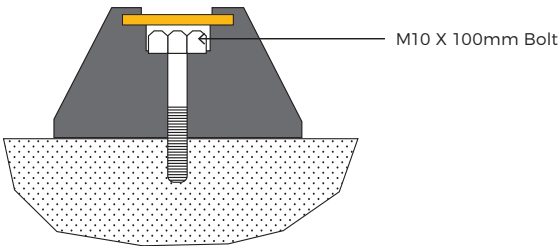

FEATURES

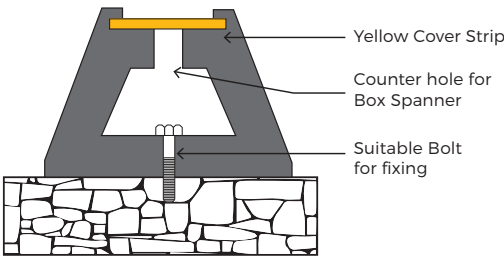

- A. Vehicle Protection: Designed to avoid damage to vehicles.
- B. Clear Guidance: Helps drivers park rear wheels correctly.
- C. Easy Installation: Pre-drilled holes for concrete or asphalt mounting.
- D. Damage Reduction: Minimizes risk to columns, pillars, and lighting.
- E. Durable Construction: Made from solid rubber for a long service life and impact absorption.

FOAM WALL PROTECTION - PANELS / GUARDS

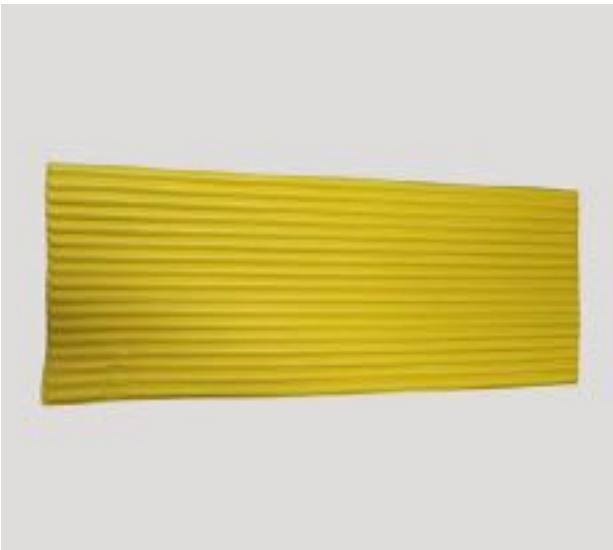

Foam Wall Protection Panels

USAGE

The Warrior Wall Padding is perfect for safeguarding areas susceptible to impact. It's ideal for children's play zones, educational facilities, gyms, sports halls, and other activity spaces where collision protection is essential.

FEATURES

- A. High-density PU foam for superior shock absorption.
- B. Durable, easy-to-clean yellow vinyl that resists abrasion and tearing.
- C. 400mm wide x 1 meter long.

Foam Wall Guards

USAGE

Warrior Foam Wall Guards are ideal for protecting walls, shelves, and other fixtures in environments where transport equipment frequently moves. They help prevent damage from collisions while being made from physiologically harmless materials that ensure safety and ease of cleaning.

FEATURES

- A. Material: High-quality PU materials
- B. Usage: Protects walls, shelves, and fixtures from damage caused by moving transport equipment
- C. Safety: Made from physiologically harmless materials
- D. Maintenance: Easy to clean

FOAM WALL PROTECTION - CORNER GUARDS / WALL GUARDS

Foam Corner Guards

USAGE

Made from high-quality materials, these corner guards are ideal for schools, nurseries, and gyms requiring soft protection. Available in various colors and sizes, they meet international standards and come in lengths up to 1.5 meters.

FEATURES

- A. Made from high-quality raw materials.
- B. Ideal for schools, nurseries, and gymnasiums where soft foam protection is essential.
- C. Available in a variety of colors.

Foam Wall Padding

USAGE

Warrior Foam Wall Guards are ideal for protecting walls, shelves, and other fixtures in environments where transport equipment frequently moves. They help prevent damage from collisions while being made from physiologically harmless materials that ensure safety and ease of cleaning.

FEATURES

- A. Material: High-quality PU materials
- B. Usage: Protects walls, shelves, and fixtures from damage caused by moving transport equipment
- C. Safety: Made from physiologically harmless materials
- D. Maintenance: Easy to clean

FOAM WALL PROTECTION - FINGER PROTECTION

Finger Protection

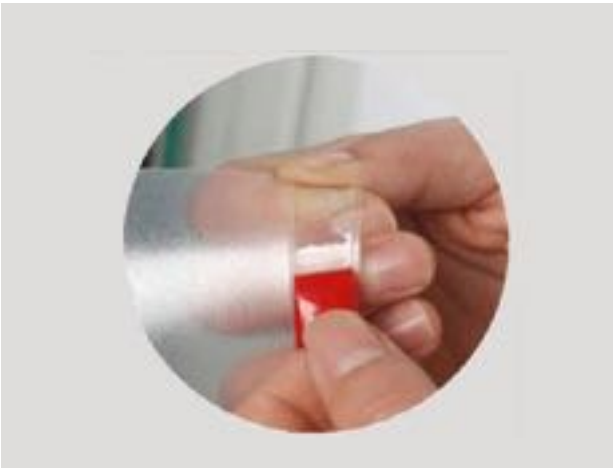

USAGE

This transparent finger protection solution is designed to enhance safety in environments where door-related accidents are a concern. It effectively prevents finger injuries by creating a barrier that stops fingers from being trapped or pinched in door gaps. The transparency of the material ensures that it blends seamlessly into any setting, maintaining the aesthetic appeal of your space. Additionally, it is highly practical, as it can be easily cleaned with just soap and water, making it ideal for areas that require frequent maintenance and hygiene, such as schools, hospitals and residential buildings.

FEATURES

- A. Durable Construction: Made from 2mm thick vinyl for long-lasting performance in high-traffic areas.
- B. Easy Installation: Aluminum profiles with built-in adhesive eliminate the need for additional tools.
- C. Size Options: Available in two sizes—Ref.113 (120 x 20 cm, 90° angle) and Ref. 113 A (120 x 24 cm, 180° angle).
- D. Transparent and Aesthetic: The clear design ensures that the finger protection does not obstruct the visual appeal of the door or surrounding area, making it an unobtrusive safety feature.
- E. Low Maintenance: Easily cleaned with common household soap and water.
- F. Replaceable Sheet: The vinyl sheet can be easily replaced if needed, allowing for continued use of the product without the need for a full replacement.

ANTI SLIP TAPE - LUMINESCENT / BLACK

Luminescent Anti Slip Tape

USAGE

Warrior Anti-slip tape is designed to enhance safety in areas prone to slipping hazards. It provides a non-skid surface on stairs, floors, ramps, and other surfaces, effectively reducing the risk of accidents or falls.

FEATURES

- A. Fluorescent Color: Highly visible in low-light conditions.
- B. Non-Skid Surface: Improves traction on various surfaces to prevent slips.
- C. Versatile Application: Suitable for stairs, floors, ramps, and more.
- D. Durable Material: Built to withstand heavy foot traffic and harsh environmental conditions, ensuring long-lasting performance.

ANTI SLIP TAPE - BLACK & YELLOW / SHOWER AND TUB

Black & Yellow Anti Slip tape

USAGE

Warrior Black and Yellow Anti-Slip Tape boosts safety by providing a non-skid surface on stairs and other slippery areas, reducing accident risks. The bold black and yellow colors serve as a clear, visible warning.

FEATURES

- A.Non-Skid Surface Strong grip to prevent slips and falls.
- B. High Visibility: Bold black and yellow colors for clear warnings.
- C.Durable: Built to endure heavy use and harsh conditions.
- D. Versatile: Ideal for stairs, ramps, and slippery areas indoors and outdoors.

NOSING - ALUMINIUM STAIR NOSING

Aluminium Stair Nosing

USAGE

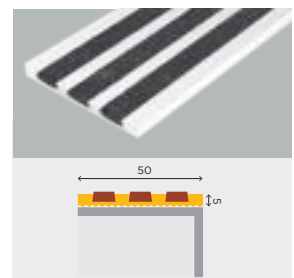

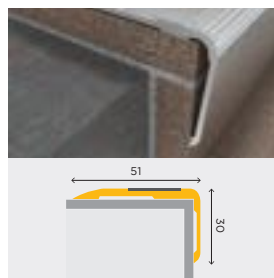

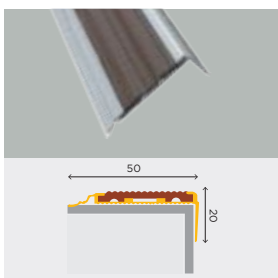

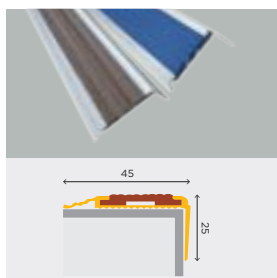

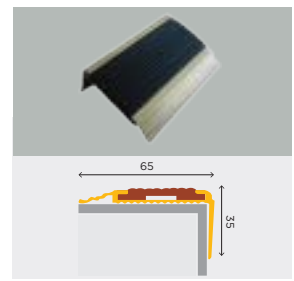

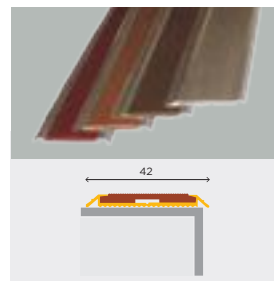

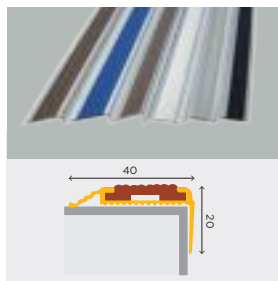

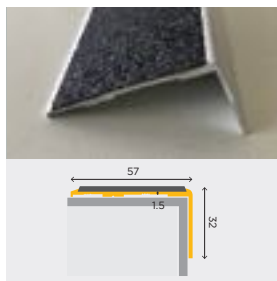

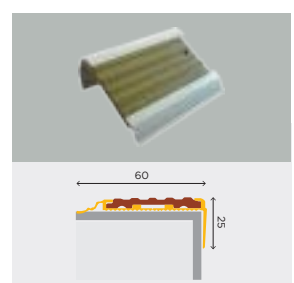

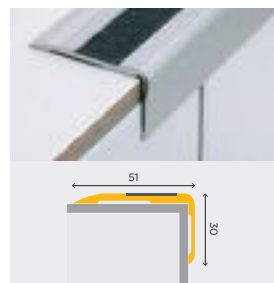

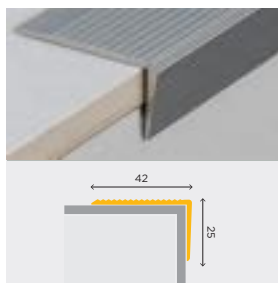

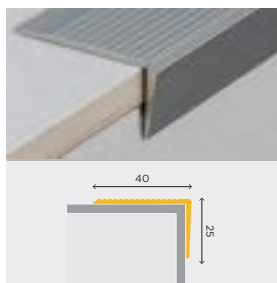

Warrior Aluminium Stair Nosing combines style and safety, using anodised aluminium grade T-6063 to enhance steps and stairs.

FEATURES

- A. For new and retrofitting applications.
- B. Provides excellent safety and durability under heavy foot traffic.
- C. Available in plain aluminium or with Carborundum tape, rubber, PVC, or in-situ Carborundum options.

TYPES AVAILABLE

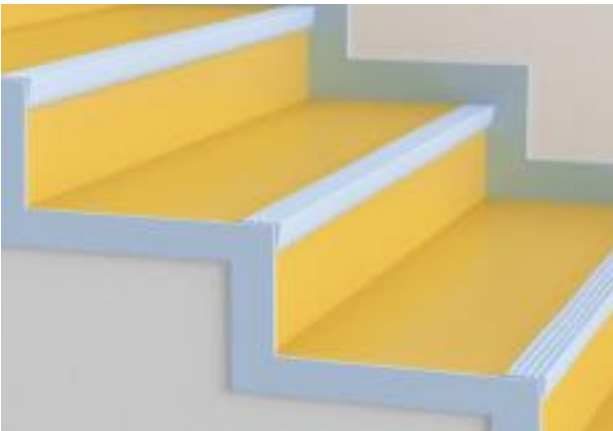

NOSING - PVC STAIR NOSING

PVC Stair Nosing

USAGE

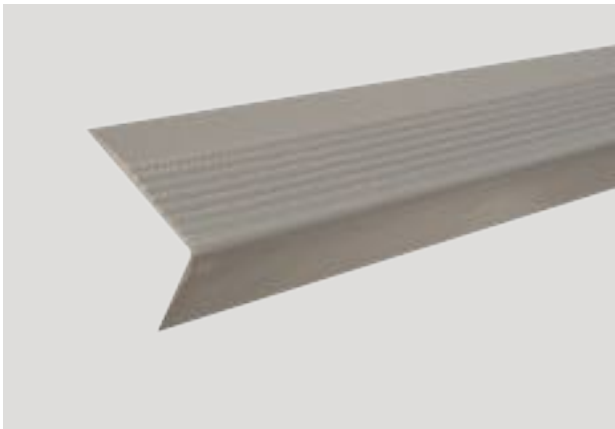

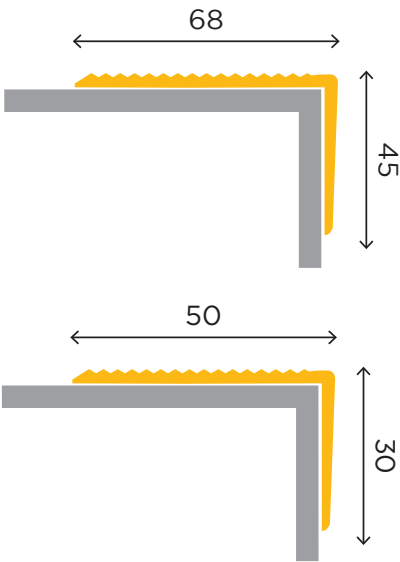

PVC Stair Nosing is designed to protect the edges of stairs while enhancing safety and aesthetics. It provides a durable, slip-resistant surface that reduces the risk of accidents, especially in high-traffic areas like commercial buildings, schools, and hospitals. This nosing also helps to prevent wear and tear on stair edges, extending the life of the stairs and ensuring they maintain a clean, professional appearance.

FEATURES

- A. Durable Construction: Made from high-quality PVC for long-lasting performance.
- B. Slip-Resistant: Provides a textured surface to prevent slips and falls.
- C. Easy Installation: Simple to install on various types of stair materials.
- D. Aesthetic Appeal: Available in multiple colors and designs to match interior.
- E. Enhanced Safety: Clearly defines the edge of stairs, reducing tripping hazards.
- F. Cost-Effective: Offers a budget-friendly solution for stair protection and safety.

TECHNICAL DRAWING

NOSING - FRP STAIR THREADS NOSING

FRP Stair Threads, Nosing & Rungs Covers

USAGE

It is designed for industrial and Oil & Gas applications, especially on metal staircases. It provides crucial slip resistance and edge protection, making it ideal for environments with heavy foot traffic and challenging conditions. This nosing not only enhances safety by reducing slip risks but also extends the lifespan of metal staircases, ensuring they remain functional and safe in demanding industrial settings.

FEATURES

- A. Robust Construction: Crafted from high-quality aluminum, it offers durability and resilience in tough environments.
- B. Slip Resistance: Features a textured surface that significantly reduces the risk of slipping, enhancing safety.
- C. Edge Protection: Protects stair edges from damage, wear, and impact, extending the life of the stairs.
- D. Heavy-Duty Performance: Built to endure heavy foot traffic and harsh operational conditions.
- E. Industrial Grade: Tailored specifically for the rigorous demands of Oil & Gas and other industrial sectors, ensuring reliability and performance.

NOSING - LED STAIR NOSING

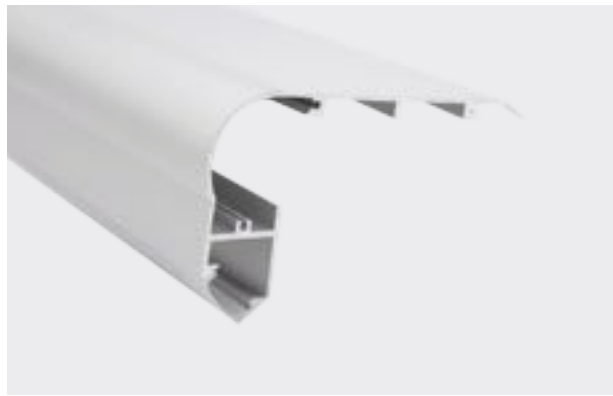

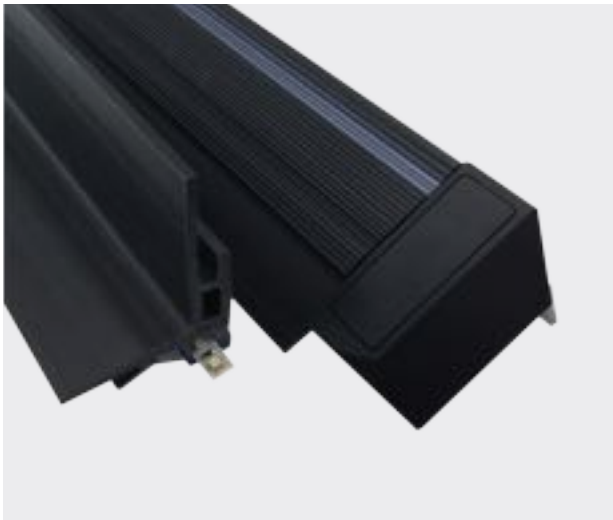

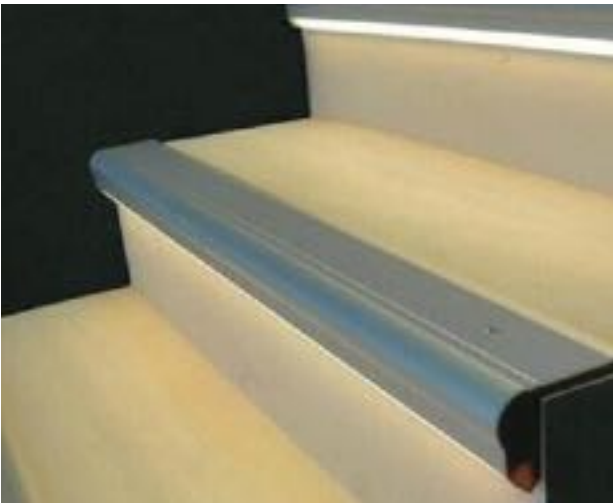

LED Stair Nosing

USAGE

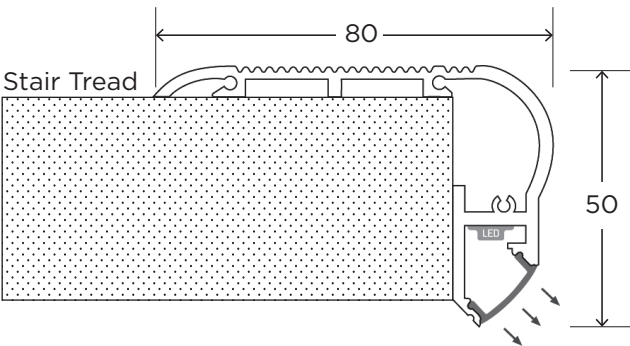

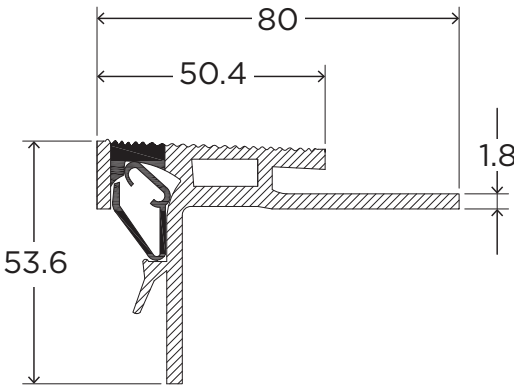

Ideal nosing solution for theaters, auditoriums, exhibition halls, amphitheaters, and similar venues, offering durability and enhanced safety.

FEATURES

- A. Material: PVC/Aluminium
- B. Compatible strip width: Max 12.23mm
- C. Lengths: 1m, 2m, 3m, and custom.
- D. LED Flexible strip

TECHNICAL DRAWING

TACTILE WARNING STUD - STAINLESS STEEL STUDS

Stainless Steel Studs

USAGE

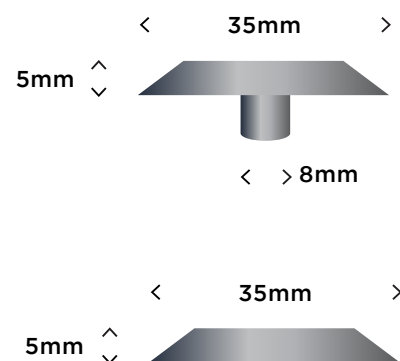

TACTILE STUDS - Surface-mounted warning studs, meticulously crafted in accordance with the international norm ISO 23599/2012, are available in various versions and colors. These studs are ideal as a tactile orientation system for blind and visually impaired individuals, suitable for both indoor and outdoor applications. The range includes specialized options such as Bicycle Tactile Studs for Tracks, Domed Shape Tactile Studs for Roads, and Ringed Tactile Studs, all designed to enhance safety and accessibility in diverse environments.

FEATURES

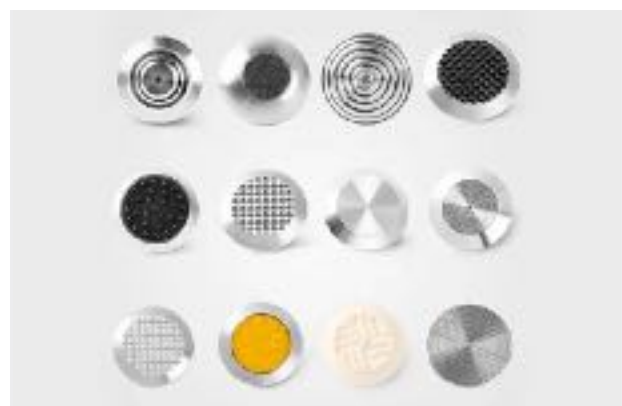

- A. Versatile: Available in multiple versions and a variety of colors to suit different environments and aesthetic preferences.
- B. Durable: Constructed to withstand harsh weather conditions and heavy traffic, ensuring long-lasting performance.
- C. Enhanced Safety: Designed to provide clear and reliable tactile guidance, improving navigation for blind and visually impaired individuals in various settings.

SKIRTING - ALUMINIUM SKIRTING

Aluminium Skirting

USAGE

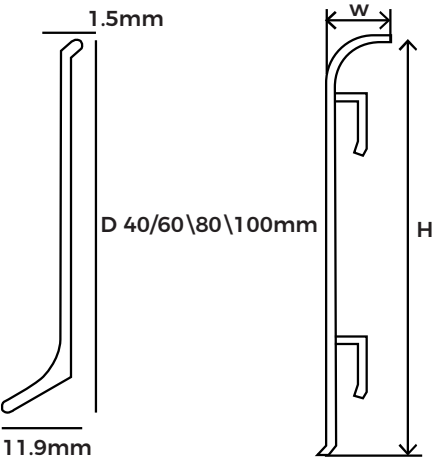

Warrior Aluminium Skirting offers the perfect solution for your skirting needs, providing a range of advantages that include exceptional durability, superior functionality, and robust resistance to corrosion and water. Its lightweight nature, combined with its recyclability, makes it an eco-friendly choice. Our innovative design options are crafted to accommodate nearly any skirting application, ensuring both versatility and style in every installation.

FEATURES

- A. Exceptional durability: Designed for long lifespan and to withstand wear and tear.
- B. Superior functionality: Offers effective protection with a modern appearance.
- C. Corrosion and water resistance: Ideal for moisture-prone environments.
- D. Lightweight: Easy to handle and install, reducing labor costs.

SKIRTING - PVC SKIRTING

PVC Skirting

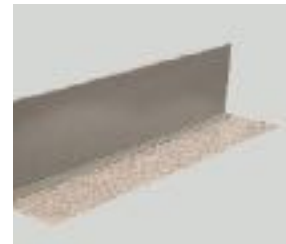

USAGE

The Warrior PVC Flexible Skirting is a versatile and durable solution designed to enhance the aesthetic appeal and protection of walls. With a range of design it offers a smooth and elegant finish. The Warrior PVC Flexible Skirting is an ideal choice for both residential and commercial settings where a flexible and stylish skirting option is desired.

FEATURES

- A. Versatile Application: Adapts effortlessly to both residential and commercial settings, making it suitable for a wide range of surfaces, including walls, floors, and stairs, while providing long-lasting durability and aesthetic appeal.
- B. Aesthetic Appeal: Provides a smooth, elegant finish, complementing any decor.
- C. Flexible Design: Easily conforms to uneven or curved surfaces, ensuring a seamless and polished look while maintaining structural integrity.
- D. Wide Range of Designs: Available in a variety of styles, colors, and finishes to complement different interiors, offering endless customization options to suit both modern and traditional aesthetics.
- E. Easy Installation: Quick and efficient with pre-measured lengths, adhesive backing, and modular components, reducing labor and costs.

ENTRANCE MAT - ALUMINIUM ENTRANCE MAT

Aluminium Entrance Mat

USAGE

These are designed to provide an effective dust control solution while adding a luxurious touch to any entrance. These mats are ideal for high-traffic areas such as commercial buildings, shopping malls, and office complexes. Their superior wiping and scraping capabilities ensure that dirt and moisture are trapped, keeping interior floors clean and dry. The mats can be recessed into the flooring for a sleek, unobtrusive appearance, making them a practical and stylish choice for both public and private spaces. With customizable options to fit specific requirements, these mats offer a tailored solution for maintaining cleanliness and safety at entry points.

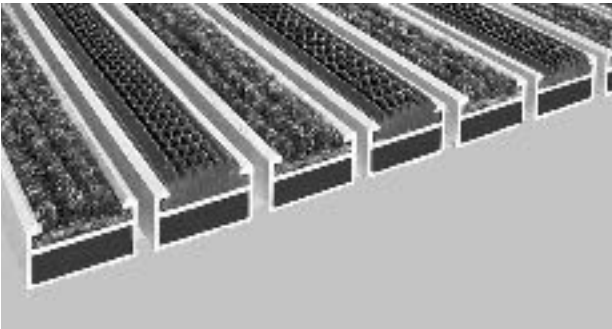

FEATURES

- A. Effective Dust and Moisture Control: Traps dust, dirt, and moisture to prevent them from entering the building.
- B. Luxurious Appearance: Enhances the aesthetic appeal of entrances with a sleek, sophisticated design.
- C. High-traffic Durability: Built to withstand heavy foot traffic and the passage of carts and vehicles.
- D. Anti-Rust Construction: Made from aluminum alloy, ensuring longevity and resistance to corrosion.
- E. Versatile Insert Options: Available with carpet, rubber, or brush inserts to meet different needs for wiping and scraping.
- F. Slip Resistance: Designed to provide excellent slip resistance, enhancing safety at entry points.
- G. Customizable: Offers customization in wall thickness, alloy height, carpet material, color, and size to suit specific needs and budgets.
- H. Recessed Installation: Can be recessed into the flooring for a seamless, integrated look.

ENTRANCE MAT - PVC ENTRANCE MAT

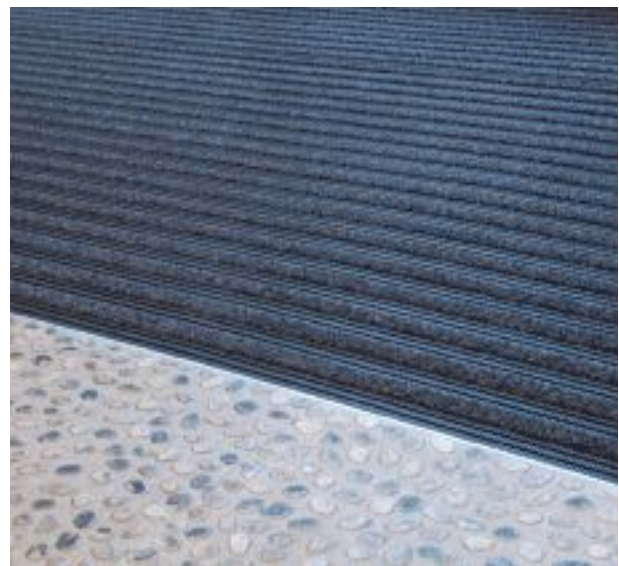

PVC Entrance Mat

USAGE

These are an excellent choice for maintaining clean and safe entryways in various settings. The mats are designed with a dual-functionality that effectively scrapes away dirt and absorbs moisture, ensuring that your entrance remains tidy and hygienic. Ideal for both commercial and residential entrances, these mats provide a balance of style and safety. They are also customizable with logos, making them a perfect option for businesses looking to enhance their brand presence while maintaining a professional appearance. The flexible design allows these mats to adapt to different entrance layouts, offering a versatile solution for a wide range of applications.

FEATURES

- A. Double-Sided Blade Design: Incorporates both sand-scraping and water-absorbing surfaces for thorough dirt and moisture removal.
- B. Enhanced Hygiene: Keeps entryways cleaner by efficiently trapping dirt and moisture, reducing indoor contamination.
- C. Aesthetic Appeal: Combines functionality with style, adding a polished look to any entrance area.
- D. Superior Anti-Slip Functionality: Provides a safe, slip-resistant surface, minimizing the risk of accidents.
- E. Customizable: Options to personalize with custom logos for branding or design preferences.
- F. Versatile Application: Flexible design allows for use in various entrance settings, adapting to different layouts and requirements.
- G. Easy Maintenance: Designed for durability and ease of cleaning, ensuring long-term performance.

ENTRANCE MAT - PVC SPIRAL LOOP ENTRANCE MAT

PVC Spiral Loop Entrance Mat

USAGE

These Mats are an ideal solution for maintaining cleanliness and safety in front entrance and exit areas. Their unique interwoven loop pattern is specifically designed to trap dirt, dust, debris, and fluids from footwear, ensuring that interior spaces remain clean and free from contaminants. These mats are perfect for both residential and commercial environments, where heavy foot traffic is common. The durable PVC construction ensures long-lasting performance, while the easy-to-clean design makes them a low-maintenance option for busy entryways. Whether for homes, offices, or retail spaces, these mats offer a practical and stylish way to keep entrances welcoming and tidy.

FEATURES

- A. Interwoven Loop Pattern traps dirt, dust, and fluids for a clean environment.
- B. Durable PVC Construction withstands heavy foot traffic.
- C. Easy to Clean, maintaining original condition effortlessly.
- D. Low Maintenance: Requires minimal upkeep, making it ideal for busy entryways where frequent cleaning might be needed.
- E. Enhanced Safety: Designed to improve cleanliness and reduce the risk of slips and falls in entrance areas.
- F. Versatile Application Suitable for both residential and commercial settings, offering a welcoming and tidy entrance for visitors.
- G. Stylish Design Combines functionality with a modern aesthetic, enhancing the appearance of any entrance area.

ENTRANCE MAT - CARPET ENTRANCE MAT

Carpet Entrance Mat

USAGE

Warrior Carpet Entrance Mats are an excellent choice for maintaining clean, safe, and stylish entryways in both residential and commercial settings. Crafted with high-quality nylon double-color wire and backed by 100% NBR rubber, these mats are designed for durability and performance in high-traffic areas. Their anti-skid and anti-static properties make them suitable for a wide range of environments, including those where static control is crucial. With a vibrant range of colors and a design that resists bending and breaking, these mats not only enhance the appearance of entrances but also provide long-lasting, reliable protection against dirt and moisture.

FEATURES

- A. High-Quality Nylon Double-Color Wire: Offers vibrant color options while ensuring durability and performance.
- B. 100% NBR Rubber Backing: Provides enhanced durability and resistance to wear, ensuring long-lasting use.
- C. Non-Bending and Non-Breaking Design: Engineered to withstand high-traffic areas without compromising its structural integrity.
- D. Anti-Skid Properties: Ensures a secure grip on various floor surfaces, reducing the risk of slips and falls.
- E. Vibrant Color Options: Available in a range of colors to match different design preferences and enhance the aesthetic appeal of entryways.
- F. Versatile Application: Ideal for both residential and commercial settings, providing a stylish and reliable solution for clean, safe entrances.

ENTRANCE MAT - EVA ENTRANCE MAT

EVA Entrance Mat

USAGE

Warrior EVA Entrance Connectable Tile Mats are a versatile and durable solution for both indoor and outdoor matting needs. These mats are perfect for environments with extreme temperature variations, as they are designed to perform effectively in conditions ranging from -30°C to +70°C. The connectable design allows for easy assembly and customization, making it simple to cover large areas or tailor the mats to specific spaces. Whether for residential entrances, commercial spaces, or DIY projects, these mats provide a practical and long-lasting solution for keeping areas clean and safe.

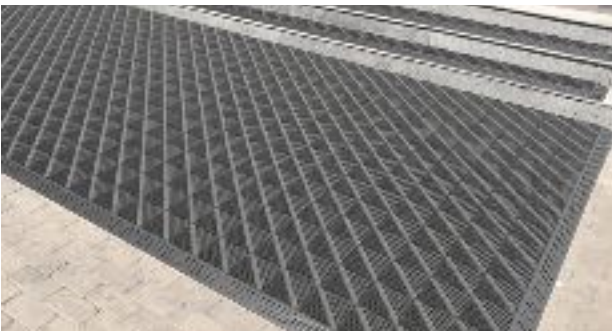

FEATURES

- A. Durable EVA and Nylon 66 Construction: Built to withstand heavy use and extreme temperatures, ensuring long-lasting performance.
- B. Temperature Resistant: Functions effectively in a wide temperature range, from -30°C to +70°C, making them suitable for various environments.
- C. Connectable Design: Allows for easy assembly and expansion, with no size limitations, making it ideal for covering large areas or custom installations.
- D. Customizable and Easy to Cut: Can be easily cut to fit specific spaces, perfect for DIY projects and tailored applications.
- E. Versatile Application: Suitable for both indoor and outdoor use, in residential entrances, commercial spaces, and more.
- F. Effortless Installation: Simple to assemble and disassemble, providing a convenient matting solution for any area.

FLOOR PROTECTION - RUBBER MAT / PVC MAT

Rubber Hollow Mat

USAGE

Warrior Customizable Entrance Mats are perfect for any space, offering tailored options in shapes, sizes, and colors to match your décor or branding. Ideal for both residential and commercial use, these mats enhance the aesthetic appeal of any entrance.

FEATURES

- A. Color Options: Select from standard or custom hues to match your décor or branding.
- B. Custom Sizes: Available in various sizes for a perfect fit in any area.
- C. Tailored Solutions: Customizable features for precise design and functionality.
- D. Versatile Use: Ideal for both residential and commercial settings.

PVC Flooring Mat

USAGE

Warrior Rubber Sheets offer durable solutions for various applications, measuring 1.2m x 12m for large surface coverage. Ideal for flooring, liners, or insulation, they ensure long-lasting performance. Available in red, blue, green, grey, and black, they can match any aesthetic or functional need.

FEATURES

- A. Generous Size: 1.2m x 12m for ample coverage.
- B. Color Options: Red, blue, green, grey, and black.
- C. Durable: High-quality rubber for lasting performance.
- D. Versatile: Ideal for flooring, liners, insulation, and more.
- E. Customizable: Easily cut to fit specific needs.

FLOOR PROTECTION - BUTTON SHEET / PAVERS

Button Sheet

USAGE

Warrior Rubber Sheets, available in 1m x 1.5m and 3mm or 5mm thickness, are versatile for both industrial and residential use. Ideal for flooring, insulation, or cushioning, their durable black design suits various projects.

FEATURES

- A. Versatile Size: 1m x 1.5m sheets for various uses.
- B. Thickness Options: Available in 3mm and 5mm.
- C. Neutral Color: Standard black suits any environment.
- D. Durable: High-quality rubber for lasting performance.
- E. Wide Use: Ideal for flooring, insulation, and protection.

Recycled Rubber Pavers

USAGE

Warrior Customizable Mats provide flexible solutions for any environment, with options to customize shape, color, and size. Ideal for both residential and commercial use, they enhance functionality and appearance, from small mats to large floor coverings.

FEATURES

- A. Shapes: Custom designs.
- B. Colors: Wide range, including standard and custom hues.
- C. Sizes: Various dimensions for compact or large areas.
- D. Customization: Matches specific design and functional needs.
- E. Versatility: Ideal for residential and commercial settings.

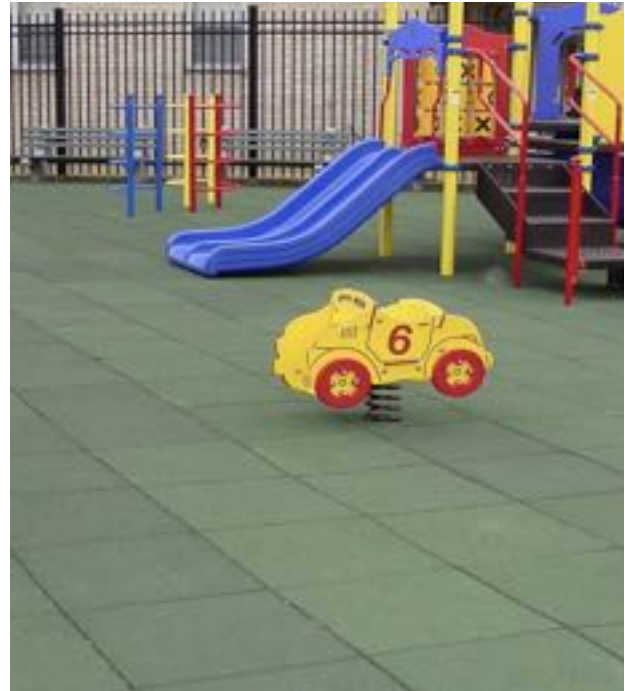

FLOOR PROTECTION - RUBBER SHEETS

Recycled Rubber Tiles

USAGE

Warrior Customizable Mats offer a highly adaptable and tailored solution for a wide range of spaces and needs. Whether outfitting a small workstation or covering a large floor area, these mats provide exceptional flexibility to meet your exact specifications. Available in an extensive selection of shapes, colors, and sizes, they are ideal for both residential and commercial settings. With customizable features that ensure a precise fit, these mats enhance functionality, safety, and aesthetic appeal, all while delivering durability and long-lasting performance for any environment.

FEATURES

- A. Diverse Shapes: Available in rectangular, square, circular, and custom designs to fit various spaces and applications.
- B. Wide Color Selection: Choose from a broad spectrum of colors, including both standard and custom options, to complement any décor or design scheme.
- C. Flexible Sizes: Offered in multiple sizes to accommodate different dimensions, from small workstations to expansive floor spaces.
- D. Tailored Solutions: The variety of shapes, colors, and sizes ensures you can find a mat that perfectly fits your specific requirements.
- E. Versatile Use: Ideal for both residential and commercial settings, enhancing functionality and aesthetics in any environment.

FLOOR PROTECTION - RUBBER SHEETS

Rubber Sheets

USAGE

Warrior Rubber Sheets are designed to deliver exceptional performance in both residential and industrial settings. Constructed from high-quality NR/SBR and Neoprene, these sheets offer a combination of durability and flexibility that makes them suitable for a wide range of applications. They are ideal for use as cushioning, protective liners, or surface coverings. Easy to install and adaptable to different surfaces, Warrior Rubber Sheets provide a practical and reliable solution for various needs, from industrial machinery protection to residential floor cushioning.

FEATURES

- A. High-Quality Materials: Made from NR/SBR and Neoprene for superior durability and flexibility.
- B. Versatile Applications: Suitable for cushioning, protection, and various other uses in both residential and industrial environments.
- C. Reliable Performance: Provides dependable performance in diverse settings, ensuring long-lasting functionality.
- D. Effortless Installation: Warrior Rubber Sheets are easy to install, adapting smoothly to various surfaces. Their flexible design ensures quick and efficient application, ideal for both industrial and residential use.
- E. Adaptable Design: Easily conforms to various surfaces and applications, making it a practical choice for a wide range of needs.

FLOOR PROTECTION - ANTI-FATIGUE MATS

Anti-Fatigue Mats

USAGE

Warrior Anti-Fatigue Mats are designed to enhance comfort and reduce strain for individuals who spend extended periods standing. Crafted from high-quality Rubber and PVC materials, these mats are ideal for use in a variety of settings, including workplaces, kitchens, and other environments where standing is frequent. They provide cushioning and support, helping to alleviate discomfort in the feet, legs, and back, and contribute to improved overall productivity and well-being. Durable and stain-resistant, these mats are well-suited for high-traffic areas and are easy to maintain, making them a practical and effective solution for reducing fatigue and enhancing comfort.

FEATURES

- A. High-Quality Materials: Made from durable Rubber and PVC for excellent resilience and comfort.
- B. Cushioning Support: Designed to reduce discomfort and strain on feet, legs, and back during prolonged standing.
- C. Durable Construction: Built to withstand heavy use in high-traffic areas, ensuring long-lasting performance.
- D. Stain-Resistant: Easy to clean and maintain, maintaining a professional appearance even in busy environments.
- E. Enhanced Comfort: Helps alleviate fatigue and improves overall comfort and productivity for individuals standing for long periods.
- F. Versatile Use: Suitable for various settings such as workplaces, kitchens, and other areas where standing is common.

DETAILED SPECIFICATIONS

Product Type	Color	Size	Thickness	Material	Available in Colors
Anti Fatigue Mat	Black and Yellow	90cm Length x 60cm Width	18-20mm	Rubber	Black/ Grey
Anti Fatigue Mat	Black and Yellow	22 Meter Length x 60cm Width	18-20mm	Rubber	Black/ Grey
Anti Fatigue Mat	Black and Yellow	3.8 Meter Length x 60cm Width	18-20mm	Rubber	Black/ Grey
Anti Fatigue Mat	Black and Yellow	22 Meter Length x 122cm Width	18-20mm	Rubber	Black/ Grey
Anti Fatigue Mat	Black and Yellow	22 Meter Length x 152cm Width	18-20mm	Rubber	Black/ Grey
Anti Fatigue Mat	Black and Yellow	22 Meter Length x 90cm Width	18-20mm	Rubber	Black/ Grey

RAILS AND CURTAINS - INFUSION DERRICK RAIL

Infusion Derrick Rail

USAGE

Warrior Hospital curtain systems offer a straightforward and budget-friendly solution for partitioning multi-bed hospital wards, providing essential privacy for patients and staff. They are also versatile enough to be used as screens in retail or leisure changing rooms and shower areas.

The Warrior Hospital Curtain combines a rigid structure with flexible configuration options, making it adaptable to various needs. This system has proven effective in hospitals, health centers, leisure centers, and hotels, ensuring privacy and functional partitioning in diverse settings.

FEATURES

- A. The system can be tailored to individual needs with customizable configurations.
- B. It is rigid and durable, ensuring long-lasting performance.
- C. Made from high-quality Polyester Fiber, available in both mesh and non-mesh types.
- D. Features include anti-flame, anti-bacterial, and waterproof properties for enhanced safety and hygiene.
- E. Available in standard colors and customizable printing colors.
- F. Typically 2.8 meters in height, adjustable as required, with mesh heights ranging from 50-60 cm.
- G. Length can be customized up to a maximum of 50 meters per roll.

RAILS AND CURTAINS - STRAIGHT RAIL

Straight Rail

USAGE

Warrior Curtain Rail System is engineered for exceptional durability, smooth operation, and stability across diverse applications. Featuring robust extruded aluminum alloy rails and ABS connector joints, it offers a reliable and seamless curtain installation solution. For high ceilings, an optional stainless steel impeding frame adds extra support. The compact pulley design minimizes curtain size, while S-shaped hooks and nano-material blocks ensure easy installation and silent movement. Additionally, the automated rail bender provides precise bending, preventing deformation and ensuring smooth, efficient pulley operation for a flawless curtain system.

FEATURES

- A. Durable Aluminum Alloy Rails: Ensures long-lasting performance, stability, and smooth operation.
- B. Seamless ABS Connector Joints: Provides a seamless fit and enhances the overall durability of the system.
- C. Stainless Steel Impeding Frame: Optional frame for high ceilings, adding extra support and stability.
- D. Compact Pulley Design: Reduces curtain size and provides a streamlined appearance.
- E. Nano-Material Blocks: Ensures silent and smooth curtain movement.
- F. Optimal Pulley Usage: Recommends 6-9 pulleys per meter with fixed points every 600mm for reliable operation.
- G. Uniform Bending with Automated Rail Bender: Uses imported H>K> technology for precise, uniform bending, preventing rail deformation and ensuring smooth sliding of pulleys.

RAILS AND CURTAINS - DISPOSABLE CURTAINS

Disposable Curtains

USAGE

The Warrior Curtain Rail System is ideal for environments such as hospitals, clinics, and other facilities where cleanliness and convenience are paramount. The system allows for easy curtain changes from the corridor, simplifying the process for both staff and patients and minimizing disruption. Each curtain is equipped with protective hooks and comes with a hygienic bag, ensuring a fresh appearance and maintaining a clean environment. This design enhances operational efficiency and upholds the highest standards of hygiene, making it a perfect choice for healthcare and similar settings where both functionality and sanitation are critical.

FEATURES

- A. Easy Replacement: Curtains can be changed from the corridor, facilitating convenience for both staff and patients.
- B. Protective Hooks and Hygienic Bag: Each curtain includes protective hooks and a hygienic bag, promoting a fresh and clean appearance.
- C. 100% Recyclable: Made from 100% polypropylene, the curtains are fully recyclable and tested for harmful substances (Oeko-Tex 100).
- D. Replacement Date Labels: Labels indicate replacement dates to help with maintenance and ensure curtains are updated as needed.
- E. Various Measurements: Available in sizes 750 x 200 cm (in stock), 600 x 200 cm, 500 x 200 cm, 450 x 200 cm, 300 x 200 cm, and 250 x 200 cm, accommodating different space requirements.

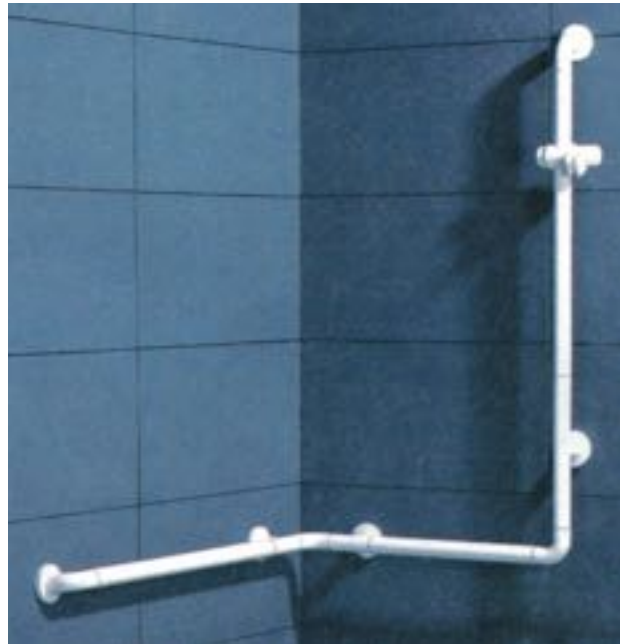

NYLON GRAB BAR - GB SERIES NYLON GRAB BAR

GB series nylon grab bar

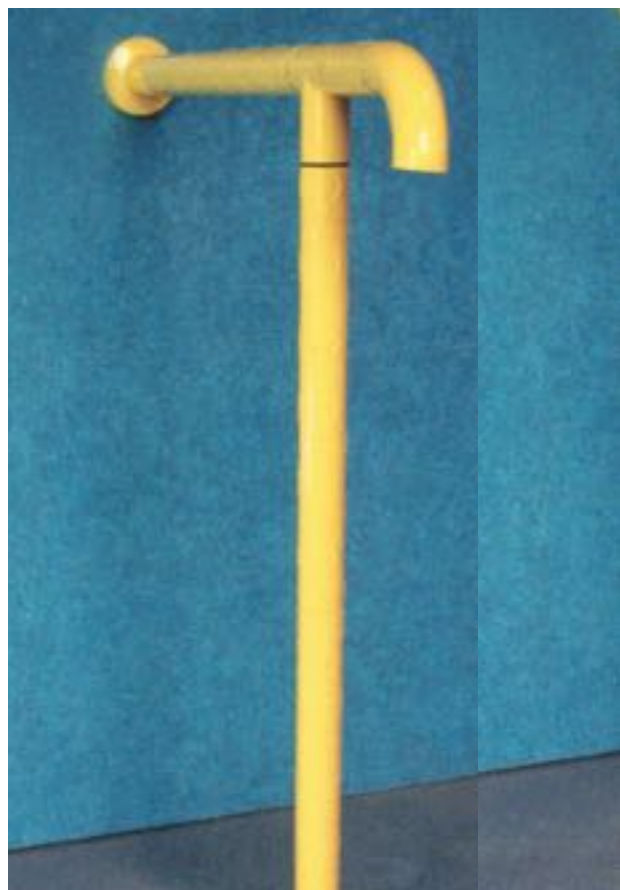

USAGE

The GB Series Nylon Grab Bar is designed to provide essential safety and support in a variety of settings, including residential, commercial, and healthcare environments. It is particularly useful in bathrooms, kitchens, and other areas where stability and balance are crucial to prevent slips and falls. This grab bar is ideal for elderly users, individuals with mobility challenges, or anyone requiring additional support while maneuvering in slippery or uneven conditions. Its robust design ensures reliable assistance, making it a valuable addition to any space where enhancing safety and preventing accidents are priorities.

FEATURES

- A. Durable Construction: Features an extruded aluminum reinforced core for exceptional strength and long-lasting performance.
- B. Slip-Resistant Surface: Embossed textured surface provides a secure, slip-resistant grip to enhance user safety.
- C. Color Options: Available in white and yellow, ensuring visibility and adaptability to various environments.
- D. Versatile Use: Ideal for use in handicap toilets, ramps, nursing home corridors, and other wheelchair-accessible areas.
- E. Accessibility Compliance: Designed to meet various accessibility needs, contributing to improved safety and convenience.

NYLON GRAB BAR - AGB SERIES NYLON GRAB BAR

AGB - 0379/0389 Series nylon grab bar

USAGE

Warrior Grab Bars are designed to offer strength, durability, and safety in various environments. Made from premium Nylon or ABS with an embossed texture, these grab bars provide a superior anti-slip grip for secure and comfortable handling. Whether used in bathrooms, ramps, or other accessibility areas, they are essential for ensuring safety and support. The internal core, engineered from durable Aluminum Alloy or robust Stainless Steel, ensures long-lasting performance and stability, making these grab bars suitable for a wide range of applications.

FEATURES

- A. TPremium Material Construction: Made from high-quality Nylon or ABS with an embossed texture for a superior anti-slip grip.
- B. Durable Internal Core: Engineered with either Aluminum Alloy or Stainless Steel, providing exceptional strength and stability.
- C. Reliable Support: Designed to offer secure and comfortable handling, ensuring safety in various conditions.
- D. Long-Lasting Performance: Combines durability and strength to provide reliable support in a wide range of applications.
- E. Versatile Application: Suitable for use in bathrooms, ramps, and other accessibility areas, contributing to safety and accessibility.

TRAFFIC SAFETY - CABLE PROTECTORS / TRAFFIC MIRRORS

Cable Protectors

USAGE

Warrior cable protectors are widely used for indoor and outdoor cable management. Low-cost rubber floor cable protectors offer effective cable management and safeguard against damage, disconnection, or snagging for both cables and users.

FEATURES

- A. Organized Cable Management: Prevents tangling and disconnection.
- B. Durable Rubber Build: Low-cost rubber offers robust protection.
- C. Snag Protection: Safeguards cables, boosting safety and longevity.
- D. Versatile: Suitable for indoor and outdoor use.
- E. Enhanced Safety: Reduces tripping hazards and keeps workspaces tidy.

DETAILED SPECIFICATIONS

Product Type	Color	Channel Dimensions	Channel Size	Base Material	Cover Material
1 Channel Cable Protector	Black and Yellow	980mm L x 260mm W x 65mm H	58mm L X 50mm H	Rubber	PVC
2 Channel Cable Protector	Black and Yellow	980 Meter L x 240mm W x 44mm H	30mm L X 30mm H	Rubber	PVC
3 Channel Cable Protector	Black and Yellow	900mm L x 500mm W x 65mm H	63mm L X 53mm H	Rubber	PVC
4 Channel Cable Protector	Black and Yellow	900mm L x 500mm W x 55mm H	63mm L X 53mm H	Rubber	PVC
5 Channel Cable Protector	Black and Yellow	900mm L x 550mm w x 50mm H	40mm L X 40mm H	Rubber	PVC

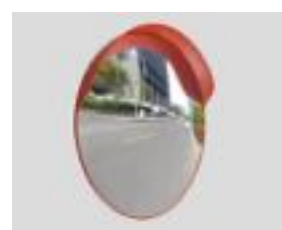

TRAFFIC MIRRORS

USAGE

The Warrior Heavy Duty Convex Traffic Mirror enhances security and safety by eliminating blind spots at intersections, narrow roads, sharp curves, and other areas with limited visibility, helping to prevent accidents.

FEATURES

- A. Wide-Angle View: Eliminates blind spots at intersections and curves.
- B. Heavy Duty Build: Withstands harsh conditions for long-lasting durability.
- C. Accident Reduction: Enhances visibility to lower accident risks.
- D. Versatile Use: Ideal for urban and rural settings like narrow roads.
- E. Traffic Flow: Improves traffic flow by enabling informed decisions.

LOADING DOCK - WHEEL CLAMPS / WHEEL CHOCKS

Wheel Clamps

USAGE

The Warrior Steel Wheel Clamp enhances vehicle security with its robust anti-theft design. Measuring 90 x 30 cm, it offers extensive wheel coverage to prevent unauthorized access. Made from durable steel, it's easy to install and protects vehicles effectively against theft.

FEATURES

- A. Wheel Coverage: 90 x 30 cm for broad wheel security.
- B. Durable: High-quality steel for strong protection.
- C. Anti-Theft: Robust defense against theft.
- D. Enhanced Security: Protects against theft and unauthorized movement.

DEATAILED SPECIFICATIONS

Product Type	Wheel Clamps
Material	Steel
Material	Yellow
Dimension	30cm H X 30cm W X 90cm L
Clamp Size	Max 32cm ~ Min 18cm
Locking Time	10-15 Seconds
Accessories	Key, Nut, Handle.

Wheel Chocks

USAGE

Warrior Wheel Chocks prevent vehicles or trailers from moving unintentionally when parked or during maintenance. Made from high-quality rubber, PU foam, or metal, they secure wheels in place, ensuring stability on inclines and preventing rolling.

FEATURES

- A. Durable Build: Made from high-quality Rubber, PU Foam, or metal.
- B. Secure Hold: Prevents vehicles and trailers from rolling.
- C. Safety: Stabilizes on inclines or during maintenance.
- D. Versatile: Fits various vehicles and trailers.
- E. Long-Lasting: Withstands tough conditions and heavy use.

DEATAILED SPECIFICATIONS

Product Type	Material	Size	Colour
PU Wheel Chock	PolyUrethane Foam	292mm L x 229mm W x 216mm H	Orange
Rubber Wheel Chock (Triangle Type)	Rubber	360mm L x 200mm W x 200mm H	Black and Yellow
Rubber Wheel Chock (Triangle Type)	Rubber	600mm L x 120mm W x 120mm He	Black and Yellow
Wheel Chock (Metal Type)	Mild Steel	292mm L x 229mm W x 216mm H	Yellow

LOADING DOCK - TRAILER STANDS / PLASTIC CHAINS

Trailer Support Stands

USAGE

The Warrior Trailer Support Stand provides stability for trailers when not attached to a vehicle. Made from high-quality steel, it prevents tipping or shifting during loading, unloading, or parking, ensuring safety and reliability during cargo handling and storage.

FEATURES

- A. Durable Steel Build: Robust support for long-lasting performance.
- B. Trailer Stabilization: Prevents tipping or shifting during use.
- C. Enhances stability, reducing accident risks.
- D. Reliable Support: Withstands various conditions for consistent use.

DEATAILED SPECIFICATIONS

Product Type	Trailer Support Stand
Material	Mild Steel
Wheel Dimension	8 Inch Diameter
Colour	Yellow
Type	Mobile
Finish	Safety Painted

Plastic Chains

USAGE

Warrior Plastic chains are versatile and used for various purposes like creating barriers, marking off restricted areas, crowd control, or designating safe pathways. They are made of high-quality plastic, durable and lightweight, offering flexibility and visibility for both indoor and outdoor applications.

FEATURES

- A. Versatile Use: Ideal for barriers, crowd control, and safe pathways.
- B. Durable Plastic: Made from lightweight, long-lasting plastic.
- C. Flexible & Strong: Suitable for various environments and conditions.
- D. Clear Visibility: Enhances organization and safety indoors and outdoors.
- E. Lightweight: Easy to handle, install, and reposition.

DETAILED SPECIFICATIONS

Product Type	Plastic Chain
Material	Plastic
Size	18.5 Meter Length x 6mm Thick
Colour	Red and White

BOLLARDS - STAINLESS STEEL BOLLARDS

Stainless Steel Bollards

USAGE

Warrior Stainless Steel Bollards are designed to provide durable and reliable safety measures across various environments. They are used to guide traffic, protect pedestrians and infrastructure, and enhance perimeter security in high-risk areas. As parking bollards, they assist in traffic management and vehicle safety, reflecting the brand's commitment to quality and effective safety solutions.

FEATURES

- A. Durable Construction: Made from high-quality stainless steel for long-lasting strength and reliability.
 - B. Traffic Guidance: Helps direct and manage traffic flow, improving overall traffic control.
 - C. Pedestrian Safety: Creates barriers to protect from vehicles.
 - D. Infrastructure Shielding: Guards buildings from vehicle damage.
 - E. Perimeter Security: Secures high-risk areas for enhanced safety.
- Aesthetic and Functional Design: Combines durability with a sleek appearance to complement various environments while serving practical purposes.

BOLLARDS - MS BOLLARDS AND BARRIERS

MS Bollards and Barriers

USAGE

Warrior Mild Steel Bollards and Barriers are designed for durability and versatility, making them suitable for both urban and industrial applications. They effectively manage traffic, protect equipment, control access, and enhance safety across various environments. These bollards and barriers are essential for maintaining order and security, ensuring that regulations are adhered to and that areas are properly protected.

FEATURES

- A. Durable Construction: Made from high-quality stainless steel for long-lasting strength and reliability.
 - B. Traffic Guidance: Helps direct and manage traffic flow, improving overall traffic control.
 - C. Pedestrian Safety: Creates barriers to protect from vehicles.
 - D. Infrastructure Shielding: Guards buildings from vehicle damage.
 - E. Perimeter Security: Secures high-risk areas for enhanced safety.
- Aesthetic and Functional Design: Combines durability with a sleek appearance to complement various environments while serving practical purposes.

DETAILED SPECIFICATIONS

Product Type	Material	Diameter	Height	Length	Installation Type	Colour
MS Bollard	MS/GI	76-220mm	1 Meter/1.2Meter/1.5Meter Or Any Custom Size	-	Floor Mounted	Safety Painted/ Powder Coated
MS Barrier	MS/GI	76-220mm	1 Meter/1.2Meter/1.5Meter Or Any Custom Size	60cm ~ 200cm	Floor Mounted	Safety Painted/ Powder Coated

BOLLARDS - CRASH RATED AUTOMATIC BOLLARDS

Crash Rated Automatic Bollards

USAGE

Warrior HVM Crash Rated Automatic Bollards are designed to offer top-tier security for high-risk areas such as airports, and stadiums. These bollards provide rapid deployment and robust impact resistance, effectively preventing vehicle intrusions and protecting critical infrastructure. Ideal for environments where security is paramount, Warrior HVM Bollards ensure reliable and effective protection against potential threats.

FEATURES

- A. Top Security: Ideal for high-risk areas like government buildings and airports.
- B. Quick Deployment: Enables immediate response to threats.
- C. Impact Resistant: Withstands strong forces to block vehicle intrusions.
- D. Anti-Ram Technology: Equipped with advanced technology to prevent ram attacks and enhance security.
- E. Critical Infrastructure Protection: Safeguards essential infrastructure from potential vehicular threats.
- F. Reliable Performance: Ensures dependable security measures and protection in sensitive and high-security environments.

BOLLARDS - CRASH RATED FIXED BOLLARDS

Crash Rated Fixed Bollards

USAGE

Warrior HVM Crash-Rated Fixed Bollards are designed to provide robust, permanent protection against high-velocity impacts, often rated K12. These high-security bollards are deployed in critical sites such as government buildings and airports to enhance perimeter security and defend against hostile vehicle attacks. Their impact resistance ensures they effectively safeguard sensitive areas from potential vehicular threats.

FEATURES

- A. High-Impact Resistance: Engineered to withstand high-velocity impacts, often K12-rated, for maximum security.
- B. Permanent Protection: Provides robust and enduring protection against hostile vehicle attacks.
- C. Critical Site Security: Ideal for deployment in high-security areas such as government buildings and airports.
- D. Enhanced Perimeter Security: Strengthens security measures and protects sensitive sites from vehicular threats.
- E. Durable Construction: Built from robust materials to ensure long-lasting performance and resilience.
