

ACOUSTIC INSULATION

AeroAcoustic is open cell made from XLPE foam (Cross Linked Polyethylene) with or without self-adhesive having very good sound absorption property and being used for different applications which needs **Acoustic Insulation** characteristics.

- Acoustic Lining (Ducts)
- Acoustic Treatment of Walls and Ceiling of Equipment Room
- In Fan, Compressor Housing and Engine Compartment

TECHNICAL DATA SHEET

FOAM PROPERTIES

Thickness Range	: 10, 15, 20 mm... 100 mm
Density	: 80 kg/m ³ (+/-10%)
Dimension	: 900 mm x 900 mm
Base Colour	: Grey / Black
Working Temperature	: from -40° C to 105° C

ACOUSTIC PROPERTIES

Sound Transmission Class	: STC-19
Noise Reduction Co-efficient	: NRC-0.5
