LGRW- SERIES

LGRW - Collection introduces Classic Style with simple and refined beauty.

MANUFACTURE

Through by advanced processing and step of technology.

All the products are tested in various stages of production to achieve the best quality of materials to our customers & end users.

USING:

Simple and easy installation

The best choice for the project.

MATERIAL : Zinc Alloy.

The zinc working process involves reduced energy consumption and releases negligible emissions into the atmosphere. Furthermore, it can be remelted and refused several times without losing its original properties. All waste that is created during the production process is fully recyclable.
